

News 2017

Ever since the bathroom started being considered living space, precepts have crumbled, rooms have been envisaged more generously, and products given more presence. We want to take bathroom furnishing even further with you in 2017.

For us the bathroom is an integral architectural element. It never exists on its own. In a similar way, the value of each of our products really only becomes evident in the respective context. Daily use in the individual environment reveals true sensuousness and sensuality.

From this deep understanding of bathroom furnishing comes the creation of completely new solutions. This can be seen in how the addition of dynamic fittings has raised PLAN, the world's most successful accessories series, to new heights. Or how the principle of reduction has been taken to its extremes with IXMO SOLO, defining a new standard in bathrooms. Or how we exploited our expertise in lighting and storage space to develop completely new light mirrors, mirror cabinets, and bathroom furniture.

We invite you to come and take a look behind the scenes with us. A look at the big picture as a whole. And to discover a new and fascinating bathroom world.

Engelbert Himrich,
Managing Partner

Hartmut Dalheimer,
Managing Director

THE BENEFITS MAKE THE DIFFERENCE

Making a difference is what our product developments for 2017 are all about. The difference can be found in the functionality. Or in the product design. Or better yet, in both – paired with excellent KEUCO quality. You will feel the difference. Because every innovation is only as good as the benefits it provides you in daily use.

- PRODUCT OVERVIEW 105-123**

PLAN

WHEN PLANNING FREEDOM BECOMES STANDARD.

Universal design is anything but haphazard. With PLAN, KEUCO has been offering architects, planners and installers maximum planning freedom for more than 15 years. Now, the world's most comprehensive bathroom furnishing concept is getting an update: A new fitting design creates a dynamic addition to the bathroom. Clever accessories impress with their practical details. Another building block in the KEUCO assortment is the rectilinear PLAN bathroom furnishings series, developed by Tesseraux+Partner in Potsdam.

DYNAMIC INTERPRETATION OF A MODERN CLASSIC

With the new PLAN S fittings concept, a new interpretation of the PLAN design is finding its home in the world's bathrooms. As a dynamic eye-catcher, the fittings are perfect for private or commercial use. The form of the angled spout of the single-lever mixer imitates the course of the water. Finishes in brilliant chrome, matt aluminium or high quality stainless steel make individual planning freedom a standard feature.

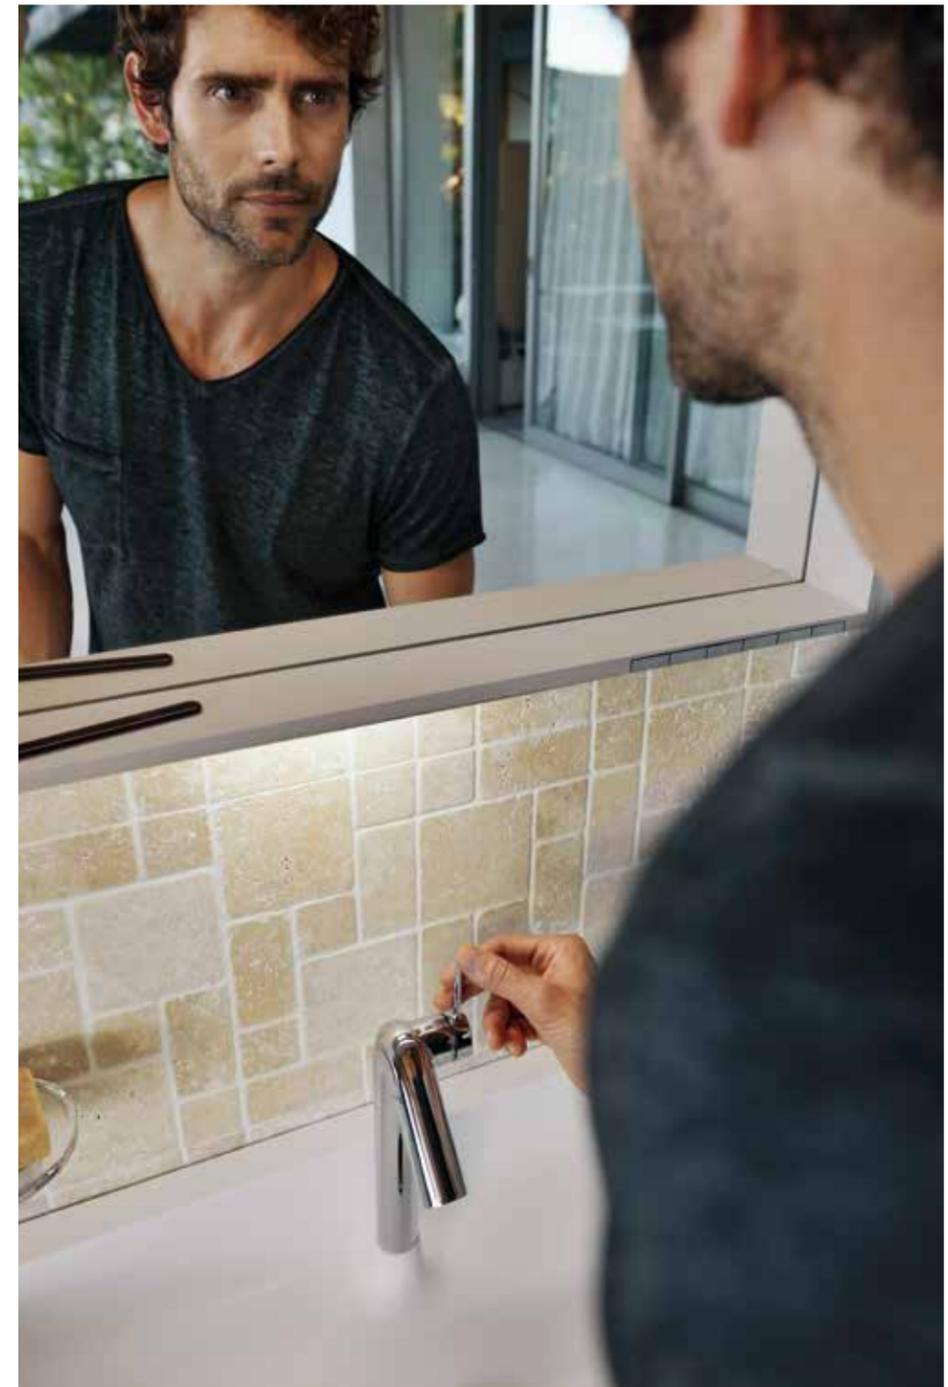

A visual and functional highlight is the in-wall single-lever basin mixer: the wall spout and control lever are combined in only one element. Clever installation features are included, thanks to the extremely thin installation unit and the depth compensation options in the wall.

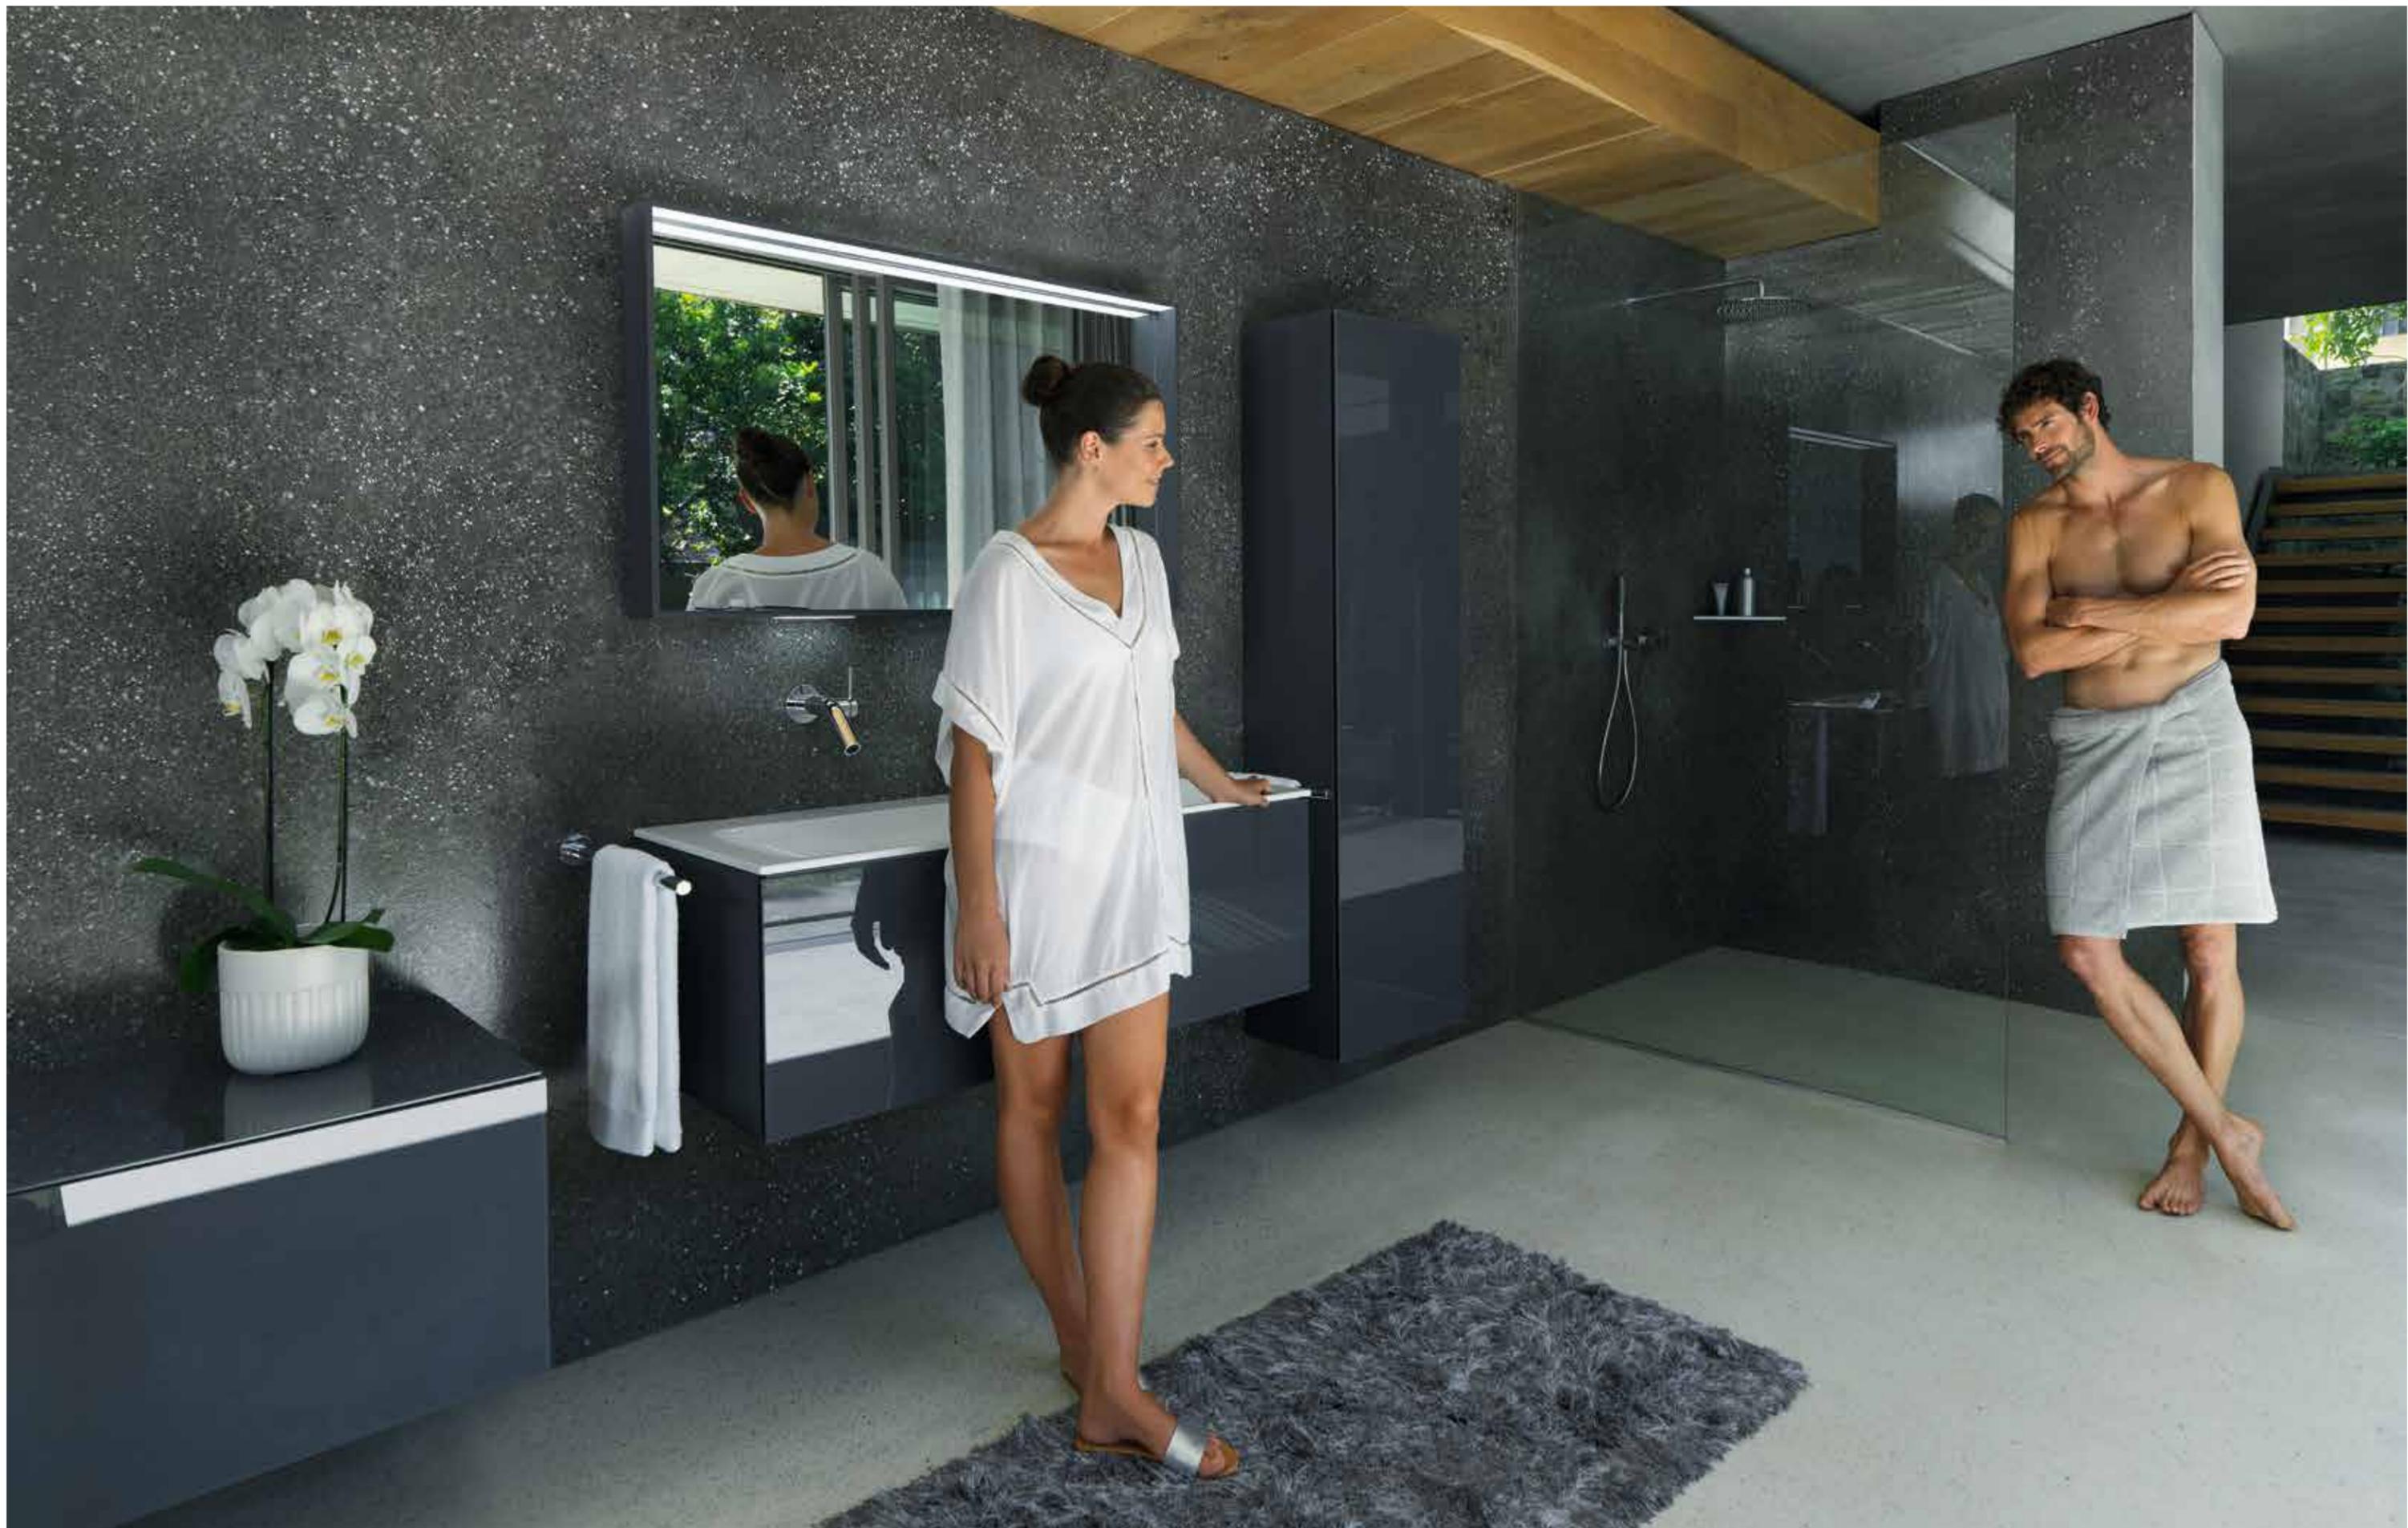

All PLAN S fittings have a filigree, upward-pointing control lever that impresses both aesthetically and practically. Positioned to the side, the spout stays clean and dry even when using the lever with wet hands.

The single-lever basin mixer, which was developed specially for the Varicor® washbasin, is an eye-catcher in every respect. Sovereignly, it stands alone raised on a small base in the washbasin. Excellent design, with you in mind.

DYNAMIC CONSISTENCY

PLAN has always been characterized by consistency. An example of this can be seen in the way the angled spout is used as a design element in other PLAN S elements. For the bath, it is either integrated in the on-wall fitting or available as a free mounted bath filler on the wall.

When it comes to designing showers and baths, with PLAN S you enjoy complete freedom. The bath tub mixer with integrated spout is mounted on the wall. And for installations with a minimalist look, the separate bath spout can also be perfectly combined with the in-wall elements of the IXMO concept. With the shower mixer the typical reduced PLAN look can be seamlessly applied to the shower cubicle.

SUPERBLY DESIGNED EVERYDAY HEROES

PLAN series' accessories are popular worldwide and have proven their worth a million times over – in hotels, public buildings and private bathrooms. By constantly talking with architects, planners and installers, we are still discovering new places where demand exists for aesthetic and useful solutions.

The lotion dispenser with its practical single-handed operation and the cup for easy filling are worth showing off at the washbasin. The one-armed towel holder from the extended PLAN product range is available in two sizes: 340 and 450 mm.

FUNCTIONALITY IN THE DETAILS

How much design and functionality can be incorporated in accessories? More than meets the eye – at least with the new PLAN shower shelf. Because, a glass wiper is integrated almost invisibly in the design. Available in brilliant chrome, matt aluminium and high quality stainless steel like all new PLAN accessories, the shower shelf optionally also comes without the glass wiper.

The perfect counterpart to this is the robust 135-degree-angled handhold. The integrated soap holder can be taken out for cleaning, and the grip is available as either right or left-sided variant. The shower shelf, glass wiper and soap dish are available in the colours dark grey, light grey or white.

The luxurious towel rack made of safety glass offers sufficient space for the shower towels of hotel guests.

EVERYTHING CONSIDERED

PLAN accessories are at home all over the world, offering an extra amount of intelligent functionality anywhere they are found. The new 5 litre PLAN cosmetic waste bin finally solves the problem of that unsightly bit of bin liner that is always visible. Because, cleverly and elegantly, an exterior jacket in chrome, stainless steel, aluminium or white is slipped over the inner bin and liner. So, from the outside the bin liner is not visible.

Specially developed for commercial use, the double toilet paper holder with roll brake integrates itself seamlessly into PLAN tradition. And anyone who values comfort will appreciate the moist tissue box with sealing ring, allowing it to be closed airtight.

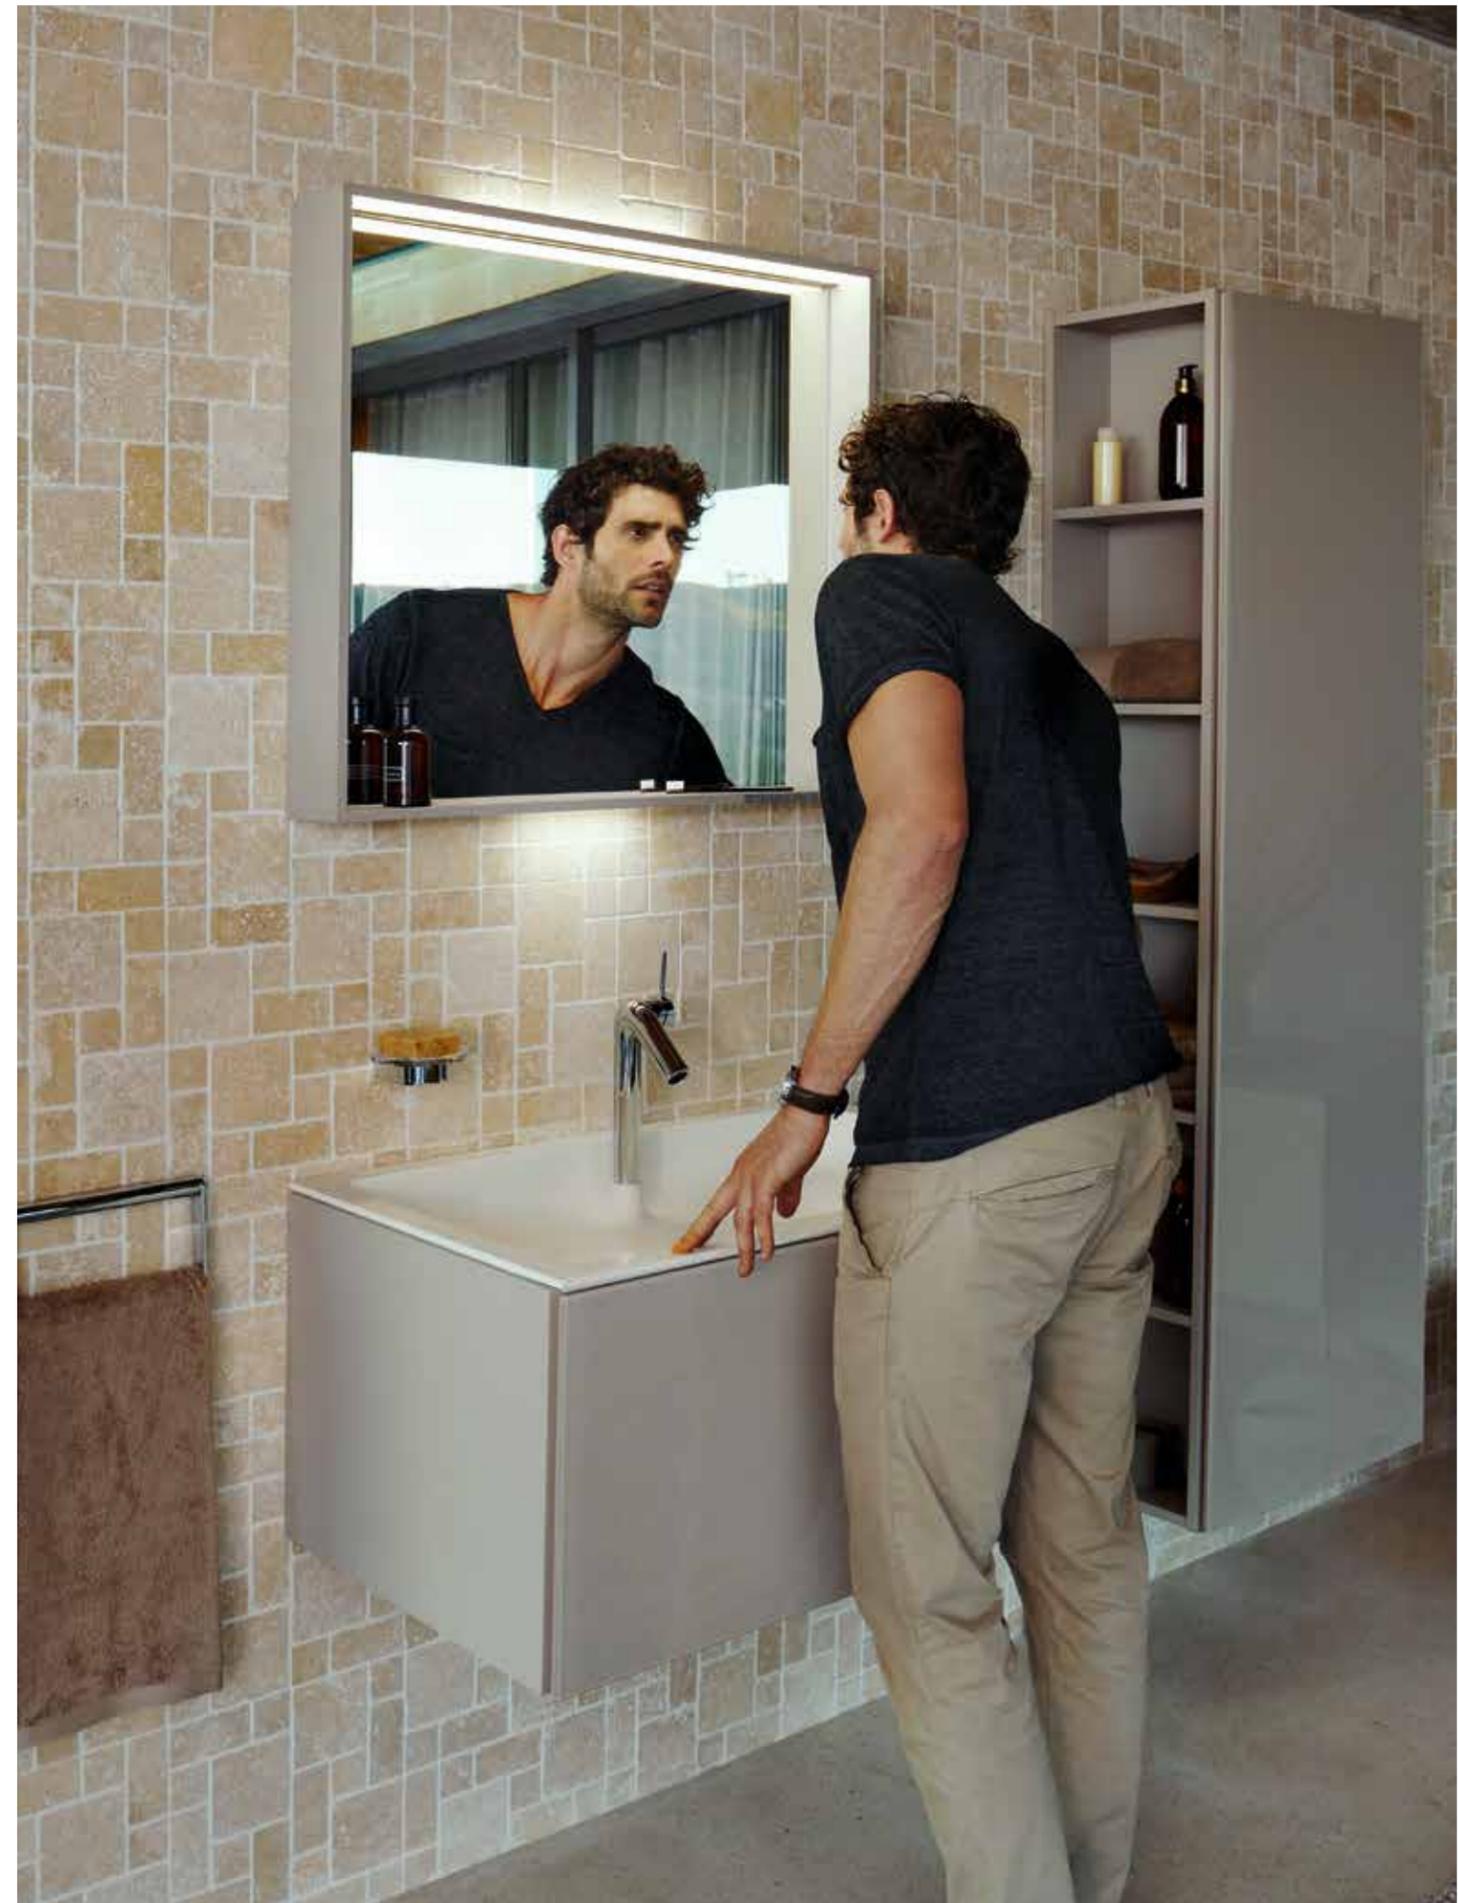

STYLE ACROSS THE BOARD

The perfect complement to all PLAN S fittings is the linear bathroom furniture, washbasins and light mirrors of the new PLAN series. Here Tesseraux+Partner in Potsdam again played a leading role.

The integral architectural approach is evident in every detail. The furniture is unobtrusively linear. From the cubic body to the luxurious glass fronts to the rim of the light mirror and even the filigree base support, the design and colour concept is omnipresent. The base supports are optionally available in four widths from 500 to 1200 mm for washbasin base units, tall units or sideboards.

In the naturally-inspired colours of cashmere, truffle and stainless steel or classic white or anthracite, each piece of furniture is uncompromisingly modern. Crowning them are washbasins with flat designs. Impressive across the board.

FREE-FLOWING LANGUAGE OF FORM

The impressive thing about PLAN ceramic washbasins is the soft, flowing shape of their flat design. Being the extremely easy-to-care-for material that it is, fine ceramic stoneware satisfies the highest standards of durability and hygiene. Depending on the chosen width from 500 to 1200 mm, single or double washbasins are available with generous surface space for different fittings. Of course, all solutions can be combined with PLAN and PLAN S fittings.

Moreover, a washbasin made of premium Varicolor® is available for PLAN bathroom furniture in the popular width of 800 mm. Add a matching PLAN S single-lever mixer, and the result is a prime example of KEUCO outstanding bathroom design.

DOWN TO EARTH DESIGN

However you view it, the new PLAN bathroom furniture is exciting. Aesthetic contrasts are its heart and soul. Mounted on the wall, the furniture exudes presence, but still emanates a certain calm and lightness. This may be due to the tone-in-tone look of the body and the handleless glass finish. Whatever the case, it is trend-setting.

Combined with the optional filigree metal support, the unobtrusive furniture makes a strong statement in the room. With their high quality lacquer finish, their colour perfectly matches the chosen body. Regardless of the bathroom size, the furniture and washbasins in sizes ranging from 500 mm to 1200 mm in two heights create a special atmosphere.

THE CONCEPT UNFOLDS

The integral PLAN bathroom furnishing concept also includes sideboards and tall units. Here, sensuousness pairs up with sensibility. The body is available in five contemporary colours. The premium glass fronts have a lusted lacquer coating on the back. The stainless steel metal look has matt satin glass.

The tall unit surprises with a shelf integrated on the side. Indiscernible from the front, the unit offers abundant space for one's daily bathroom utensils.

The design of PLAN furniture also features intelligent functionality in the details. With its additional interior drawer, the high vanity unit has a surprise in store. The tidy arrangement inside allows direct access to your care articles and is tailored practically to your needs.

PICTURE PERFECT

Like all KEUCO products, the PLAN crystal and light mirrors feature both aesthetic as well as practical components. Combined with the linear furniture, they form a harmonious whole. The surrounding frames emphasize the perfectly-coordinated colours to great effect. Although it must be said that the lacquer finish of the premium aluminium frame is still very durable and easy to care for.

Innovative LED lights are integrated in the upper edge of the PLAN mirror frame. Thanks to the careful sorting of the individual LED modules, the effect of the light is very harmonious, ensuring perfect illumination of the face. The control unit is integrated in the slender frame and offers very intuitive operation. The light colour can be varied, and the washbasin and main lighting can be switched on or off and dimmed separately. The next time it is switched on again the intelligent electronics remember the most recent lighting scenario. A practical mirror heater is available as a further option.

LIGHT MIRRORS & MIRROR CABINETS

WHEN LIGHT BECOMES THE ESSENCE.

KEUCO has years of expertise in light and storage space. This expertise didn't just appear out of thin air. It is the outcome of systematic investment in the technologies of the future. Our highest priority is to perfect light in its purest form. This may sound philosophical, but it involves painstaking effort. Each of the circuits we install is fitted manually with LED modules. Why? Because careful pre-sorting according to light colour in a process called binning is the only way we can ensure that the LED modules project a completely harmonious overall picture. After all, that is what our customers want to see every morning in the mirror.

ROYAL LUMOS

ONLY ONE LIGHT MATTERS: THE RIGHT ONE

Is that a mirror or is it really art? With the ROYAL LUMOS mirror cabinet, that is the question that comes to mind. With its illuminated frame on three sides it appears to slightly hover. Good that it offers the perfect shelf compartment for daily use where it displays all your favourite items in a prominent position.

The ROYAL LUMOS, developed by the blisse-zetsche design agency in Munich, has three separate LED light sources: The translucent frame serves as the main source of lighting, which establishes the right light for room and face. The washbasin lighting radiating downwards adds accents of atmospheric lighting on the fitting and washbasin. The indirect lighting makes the shelf compartment a functional and aesthetic highlight with its mirrored back.

Behind the surrounding translucent frame glow high performance LEDs, whose light colour and intensity can be adjusted to an infinite number of levels: From a daylight white light of 6500 Kelvin, ideal for daily care, to a warm-white light of 2700 Kelvin, for a perfect evening makeup or an atmospheric bathing ambience. The intuitive control panel allows individual control of the LEDs. Once again KEUCO sets the standard with this specially developed lighting concept.

ROYAL LUMOS

PLAINLY AMAZING

Even the interior of the ROYAL LUMOS mirror cabinet radiates with design and quality made in Germany. Prominently featured in the design is the integrated shelf compartment, giving priority to the practical. Even with mirror doors closed, it still allows easy access to frequently-used utensils. A premium inlay made of linoleum acts as scratch-free shelf surface for watches or jewellery.

The ROYAL LUMOS is outstanding. It can be installed as a classic on-wall mirror cabinet or as an in-wall model, partially recessed. The interior features of both are of the highest quality: Rear and side walls as well as revolving doors have mirrored inner surfaces and the height of the glass shelves can be adjusted. The soft-close hinges mean that the doors shut lightly and softly.

Available in six widths ranging from 650 to 1400 mm, it opens up individual design possibilities for bathrooms large and small. Depending on the width it is fitted with up to three mirror doors and is perfect for both single or double washbasins.

LIGHT, JUST AS YOU NEED IT

Naturally, it isn't possible to re-invent light. But it is possible to optimise it aesthetically and practically for new applications. And that is exactly what we have done with the innovative ROYAL L1 mirror cabinet series. Come and enjoy a bathroom mirror cabinet with us, with three modern LED light sources and a completely new kind of intelligent rotary dimmer. It will allow you to produce the perfect atmosphere of light in the bathroom for every occasion.

The generous yet elegant overhead LED light is literally the highlight of the new ROYAL L1 mirror cabinet. It is enthroned above the fully-mirrored cabinet body and radiates a warm-white light of 3000 Kelvin. The new washbasin lighting, concealed on the underside of the body, bathes the fitting in the perfect light. And the integrated wall lighting surrounds the mirror cabinet with an extraordinary aura. All three light sources impress with an extremely high level of brightness and colour fidelity.

The ROYAL L1 comes in six sizes from 500 mm to 1300 mm, with one, two or three doors with mirrors on both sides – so it is compatible with virtually every common washbasin format. Starting at a length of 1200 mm the washbasin lighting is designed for double washbasins with two fittings – to highlight chrome surfaces and uniquely designed forms in a particularly prominent way. The rotary dimmer can always be found to the right on the underside of the cabinet body. Its intuitive operation allows adjustment of the light mode and intensity by pressing and rotating. Both settings are saved when it is switched off and automatically activated again the next time it is switched on.

Not only does the ROYAL L1 mirror cabinet capture gazes, but it also knows how to direct them perfectly, too. One reason for this is the three light modes, which can be adjusted to any setting with the help of the intelligent rotary dimmer. But another reason is the many proven details in the fittings, which allow you to make optimum use of the storage space. The glass shelves can be adjusted individually to different heights, with optional anodised aluminium interior drawers available to choose from, too.

Mode 1: Wall and front lighting
The “working light” is perfectly suited to routine trips to the bathroom. The overhead light illuminates the front; discreet wall lighting can be found on its back.

Mode 2: Only washbasin lighting
The warm and glare-free “orientation light” is perfectly suited to the nightly trip to the bathroom or for a relaxing time in the bath tub, because only the washbasin and the fitting are illuminated.

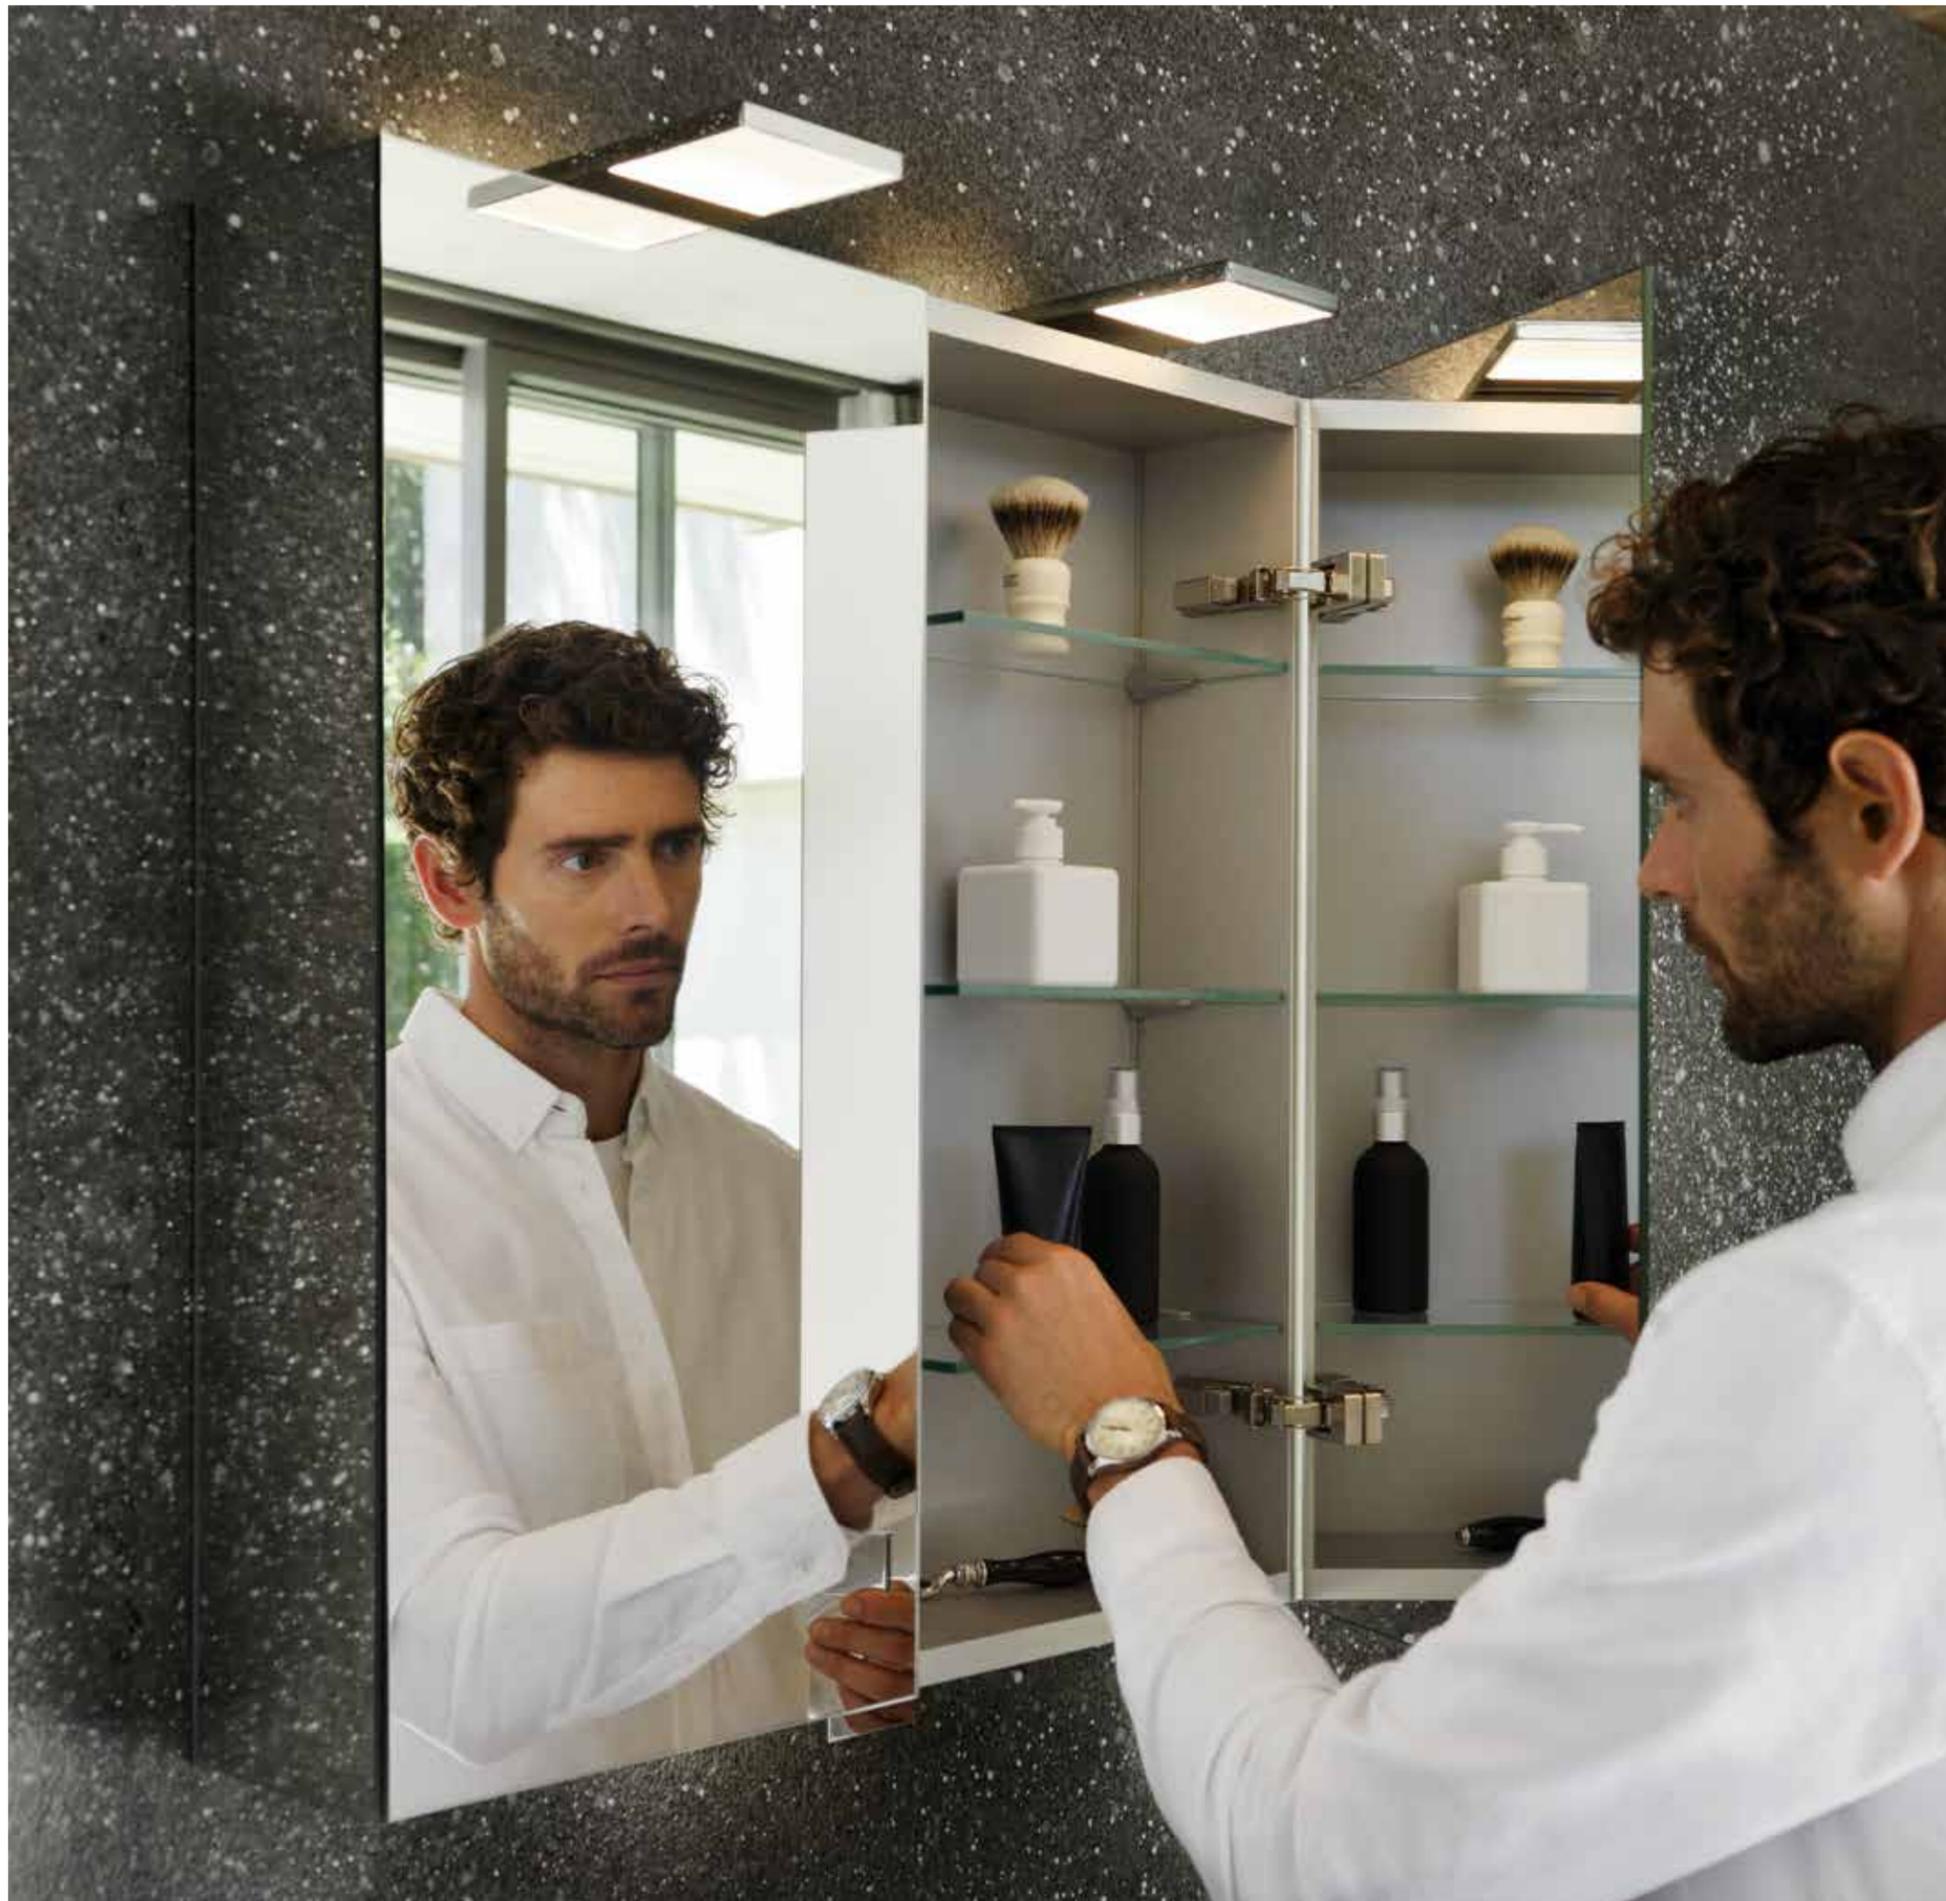

Mode 3: All three light sources
Since wall, washbasin and front lighting are all activated in this mode, everything is perfectly illuminated: The washbasin, the person standing in front of it, and even the wall behind.

A CLASSIC AT A SLENDER PRICE

KEUCO's expertise in light and storage space is incorporated in every mirror cabinet. With its slender design the new ROYAL 15 prominently features overhead LED lights made of light-conducting material in an unobtrusive chrome plated frame. They provide frontal room lighting and indirect wall lighting. During the night the additional LED washbasin lighting serves as orientation light. Together they offer ample light to illuminate the entire room. All three lighting scenarios can be steplessly controlled with the intuitive rotary dimmer, which always remembers the most recent setting.

The fully mirrored surface gives the contemporary look of the cabinet an even more luxurious flair. The mirror cabinet also offers impressive interior features: variably configurable storage space, fully mirrored revolving doors with soft-close hinges, and two electric sockets inside. At a width of 500 mm, the ROYAL 15 has one door; at 650-1000 mm two doors, and at 1200 mm it even has three. As such it is perfectly at home installed above double washbasins, and with a variety of styles in the bathroom.

EDITION 400

COMFORT IN PERFECTION

EDITION 400 aluminium mirror cabinets will convince you with their filigree features and timeless design, and with superior technical refinements. And your daily bathroom utensils are not the only thing these storage wonders created by Tesseroux+Partner conceal inside. In the slender doors an innovative mirror heater is now also integrated. This practical and convenient extra prevents the mirror cabinet from fogging up after a shower. A particularly clever feature: The sensor-controlled mirror heater switches off again automatically 20 minutes after being switched on.

In terms of light technology, the mirror cabinets are also state-of-the-art. A special light-conducting material conducts the light of the LEDs to the surface, providing the ideal lighting for the room or face at all times. With the intelligent sensor controls both the light intensity as well as the luminous colour can be adjusted to any setting – from a warm-white light of 2700 Kelvin to a bright-white daylight-like light of 6500 Kelvin. Thus the viewer is always shown in the best light, depending on time of day and personal preference. So, with the numerous on-wall and in-wall installation variations available for EDITION 400 mirror cabinets, why do without the extra comfort?

EVOLUTION OF LIGHT

A classic can experience no higher honour than an update. The new ROYAL REFLEX.2 light mirrors and mirror cabinets echo the uncompromising character of their predecessors but perform with innovative technology and new features.

For their lighting they use state-of-the-art LED technology. Thanks to the high level of brightness and colour fidelity, the lamps radiate a cosy light with a warm-white luminous colour of 3000 Kelvin. On the mirror cabinet they can be found in the front lighting, and on the light mirror in the lights on the sides. New in both is the additional light source: The washbasin lighting establishes the perfect illumination for the fitting and washbasin.

In each case the LEDs are controlled by an innovative, intelligent rotary dimmer. With it you can adjust the light intensity to any setting and choose between three different lighting modes: Washbasin lighting, front or side lighting, or both light sources together. Naturally the new mirror cabinets and light mirrors still match all ROYAL REFLEX washbasin formats: From the small 500 mm model for the guest WC right to the 1300 mm model for double washbasins – in this case with two light sources to illuminate the washbasin.

IXMO

WHEN EVERYTHING ELSE IS STRIPPED AWAY, ONLY THE ESSENTIALS REMAIN.

That is why with IXMO we challenged the accepted standard for in-wall fittings. We integrated functionality and radically pared down the design. With IXMO SOLO we have now gone even a step further. Because all that is needed for a complete shower solution is one single fitting element on the wall. This minimalism sets a new standard in bathroom design. Anything less would be nothing.

MINIMALISM IN THE SHOWER

With the new member of the IXMO family, the motto “less can do more” has never been so true. IXMO SOLO is truly a functional wonder: The impressive thing about this little module is its intelligent combination of innovative technology and minimalist design.

The result is a fitting that uniquely combines a single-lever mixer and hose connection. Minimum installation work, maximum convenience – because only IXMO SOLO and no further water-conducting elements is all that is required for a complete shower solution.

The IXMO SOLO product design is so consistent and small that a picture of perfection is produced in every shower. And with the round or rectangular decor disc options, IXMO SOLO also perfectly matches all other KEUCO lines.

WATER WILL FIND ITS WAY

For planners and architects, the IXMO concept isn't just about minimalist design, it is especially about maximum design freedom. Because, with the existing IXMO components and the new IXMO SOLO single-lever mixer, different installation types can now be impressively realised for the private household, the multi-family unit or the hotel branch.

The **one-way installation** with IXMO SOLO reduces the installation work to one water-conducting element on the wall.

For the **two-way solution** with two outlets, just two proven IXMO modules are required on the wall.

For the **three-way installation**, only two elements are needed on the wall, thanks to the 3-way stop and diverter valve.

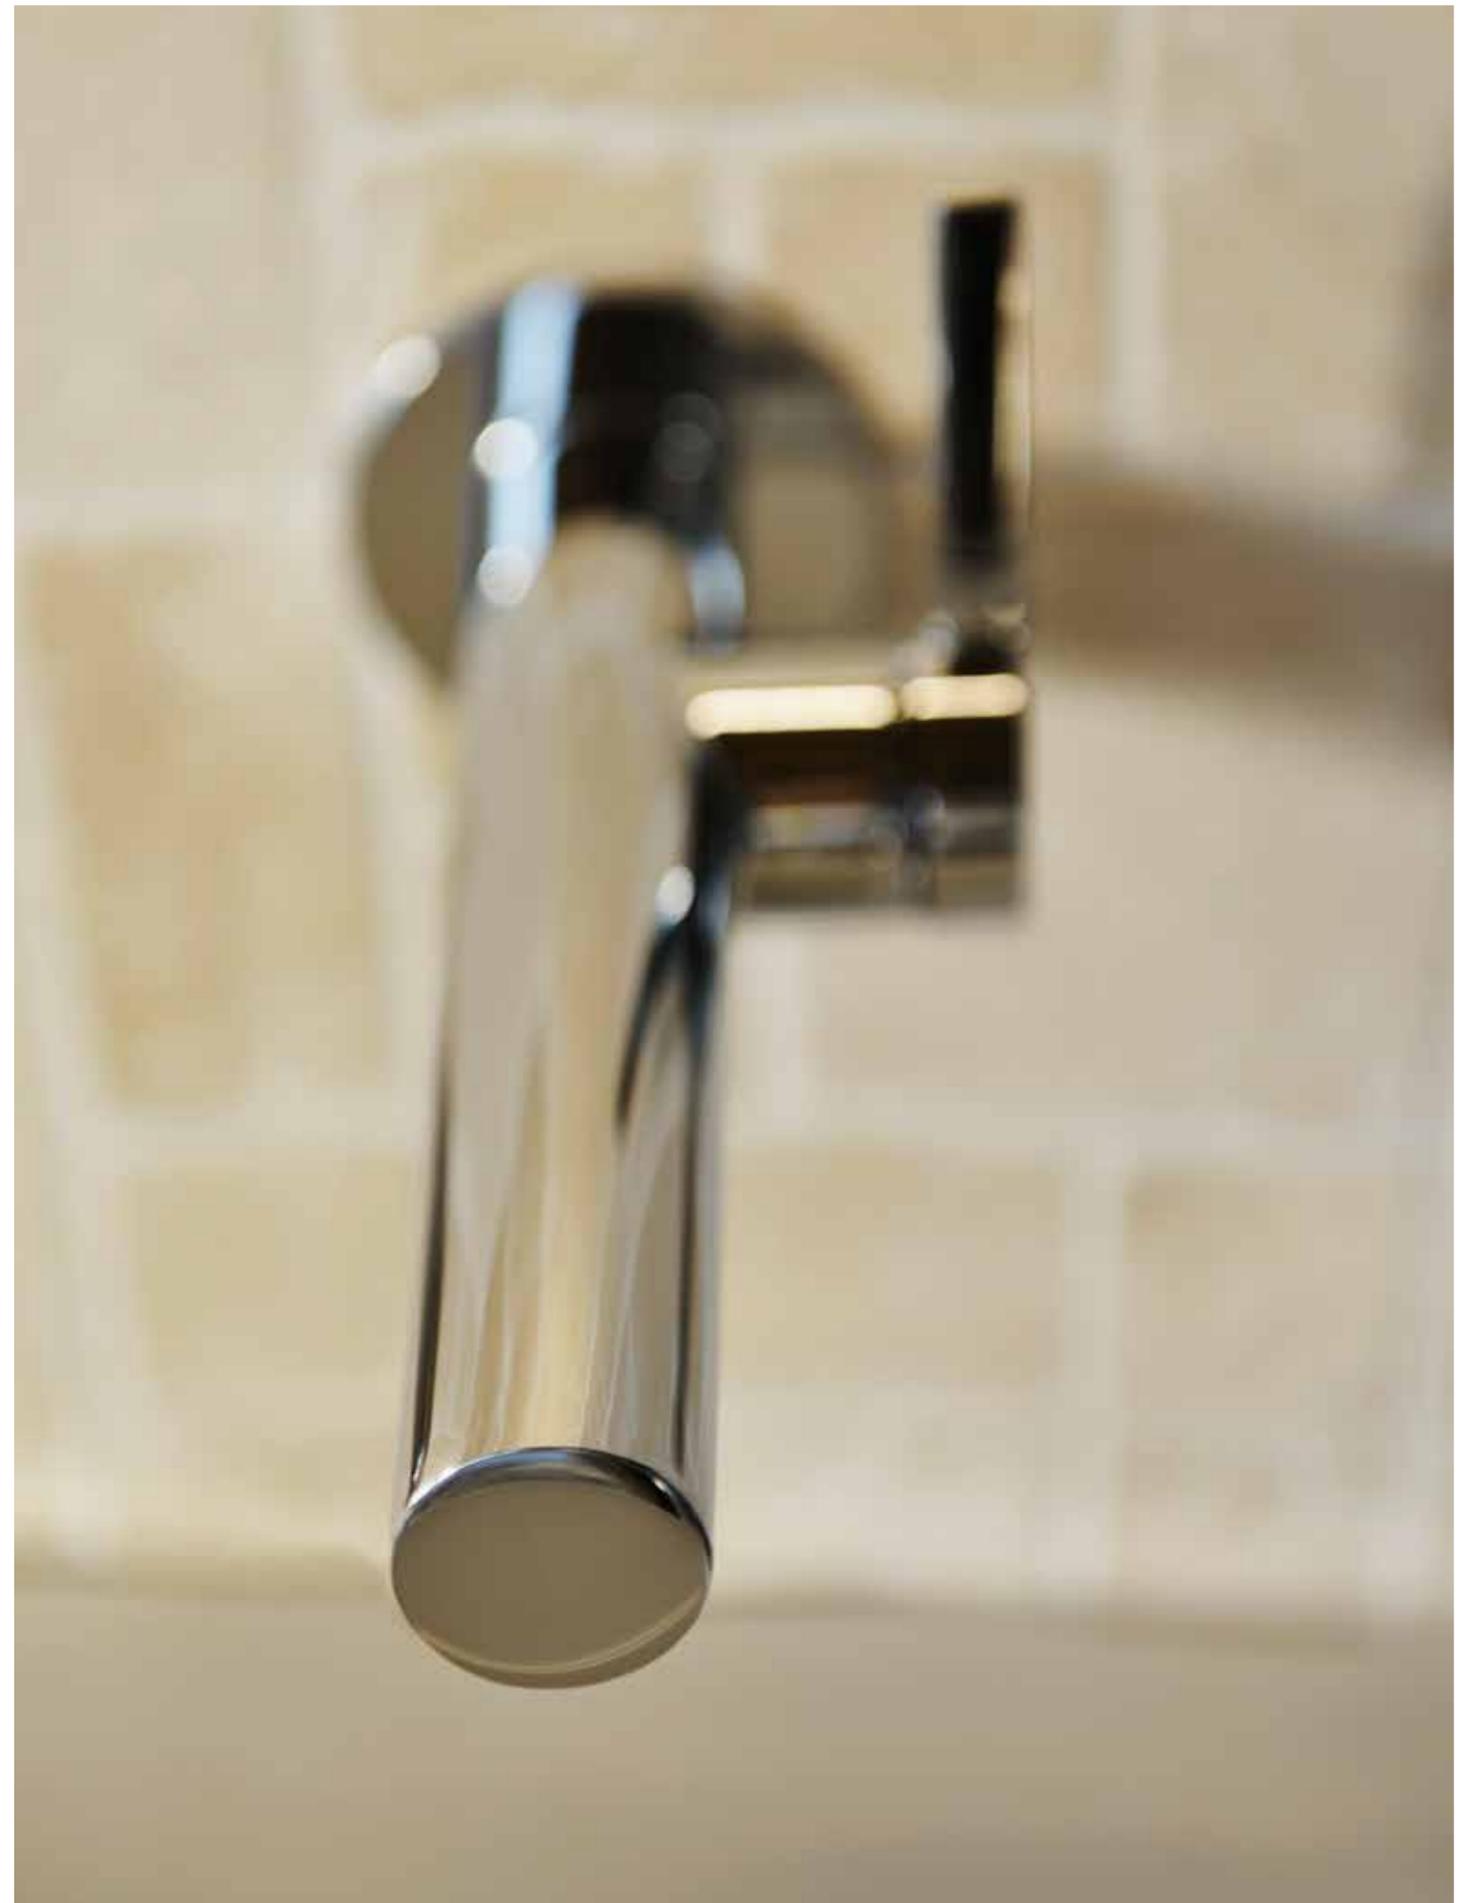

Find out more about IXMO and visit our online planner at www.ixmo.de

IXMO

IXMO GOES WASHBASIN

If it works impressively in the shower, it will be perfect for the washbasin, too. As such, we have now transferred the IXMO principle to an integrated washbasin fitting. When the wall spout and the single-lever mixer are combined in only one fitting element, as shown here, planning freedom benefits. The in-wall fitting comes with either a round or square decor disc and lends a luxurious, tidy feel to the wash area.

Minimal also aptly describes the installation work involved for all IXMO modules. HVAC pros only need to install one in-wall base structure. With the clever depth-compensation feature, the already shallow installation depth of the washbasin fitting can be flexibly varied anywhere from 70 to 100 mm. Maximum installation intelligence.

SPECIAL FINISHES

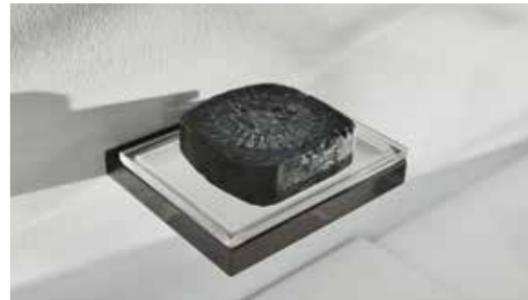

EXTERIORS MADE LUXURIOUS.

At KEUCO even a clear design feature such as the new luxurious metal finishes is not a goal in itself. The PVD process produces more than just breathtaking colours – it also makes the fittings and accessories extremely durable. The fact that the extravagant metal finishes in warm bronze, champagne-coloured nickel and opulent black are currently extremely trendy is almost uninteresting. As a perfect combination of beauty and durability, the exclusive finishes add colourful accents. In upscale hotels or deluxe private homes they lend a very personal note to a bathroom.

EXTRAVAGANCE IN THE BATHROOM

The production process is as remarkable as the look itself. The finishes are not produced by electroplating, as is typical, but rather in a PVD coating process. In the physical vapour deposition process, a thin coating is applied to the metal object in vacuum conditions, allowing a variety of colours. The process produces extremely durable surfaces with an intense, deep shine and high degree of hardness. The luxurious look on the fittings and accessories – as seen here in black chrome – is a real eye-catcher!

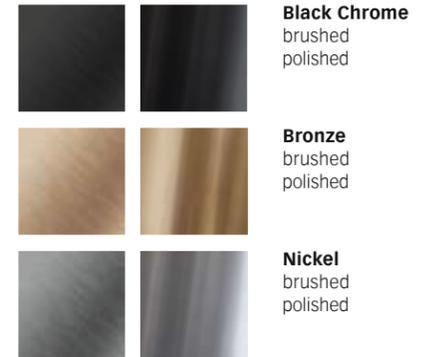

EDITION 11 fittings and accessories, in black polished chrome

The extravagant metal finishes are available in the three colours of bronze, nickel and black chrome – each in matt brushed or lustred polished.

EDITION 400 fitting and towel ring, brushed bronze

EDITION 11 fitting and tumbler holder, brushed nickel

KEUCO offers the luxurious finishes exclusively for the timeless fittings and accessories of EDITION 11, EDITION 400 and the IXMO fitting concept. KEUCO produces these exclusive design pieces on a custom order basis.

SMART.2

WHEN DESIGN BECOMES AFFORDABLE.

We have developed a new range of accessories for the needs of special target groups with SMART.2. The universal design and the robust quality perfectly satisfy the demands of architects, planners and installers alike. Developed by the Quintessence design agency in Stuttgart, the attractively-priced series is suitable specifically for the requirements in the commercial area.

SMART.2

SIMPLY PRACTICAL

SMART.2 accessories make a good impression all round the washbasin. Both the tumbler holder and the soap holder impress with their genuine, high quality crystal glass, while the lotion dispenser in white opaque plastic is practical to use.

The practical two-armed towel holder can be swivelled and the holder of the towel ring can be mounted either to the left or to the right. This means that a decision about the mounting side only needs to be made during final installation. The holder is simply inserted on the desired side and snaps on – no bolts or screws are necessary.

With its new materials and functionality, SMART.2 has lots to offer even for the shower and WC area. The spacious shower basket has a high edge, so no shower utensils can fall out. The robust grab bar can bear a load of up to 115 kg. Matching towel rails in widths of 600 mm and 800 mm and a towel hook round off the assortment.

The brush holder of the toilet brush set is made of easy-to-clean white plastic. The metal arm of the toilet paper holder can be mounted either to the left or to the right. Depending on habit or the local conditions, the arm is simply inserted on the desired side and snaps in. Fixed in place and finished! For this the spare paper holder is a perfect match.

EDITION 400

WHEN GOOD DESIGN CONTINUES ON.

That is the reason why KEUCO developed EDITION 400. It is already a classic of superior bathroom design. The clear, stylish use of shape in the furniture, accessories and particularly the sculptural fittings are now due to continue in an exciting way. The free-standing bath tub mixer and new accessories effortlessly take their place in the contemporary bathroom.

STATUE FOR THE BATHROOM

The shapes of KEUCO's sculptural EDITION 400 fittings speak a language of accentuation. And this is clearly carried over to the free-standing bath tub mixer. Organic forms merge with linear contours to create a harmonious whole. Brilliant finishes emphasize their shapes to great effect. The new bath tub fitting with separate hand shower and practical glass shelf for bathroom utensils impresses with a sovereign design. It can stand alone, but it can also be perfectly combined with a variety of bath tubs.

DESIGN IN EVERY CORNER

EDITION 400 is an integral bathroom furnishing concept. Form and function unite even in the details. For example, the new shelf for corner installation in the shower is made of solid silver-anodized aluminium and is available with or without integrated glass wiper. The white glass wiper made of robust, easy-to-care-for plastic with a high quality rubber lip impresses as an unobtrusive design element.

With its clear and minimalist design it fits perfectly in any corner of the shower and is never in the way, despite its generous shelf space. Each detail has been thought through: The single-edge fastener on one side even makes it pleasantly convenient to install.

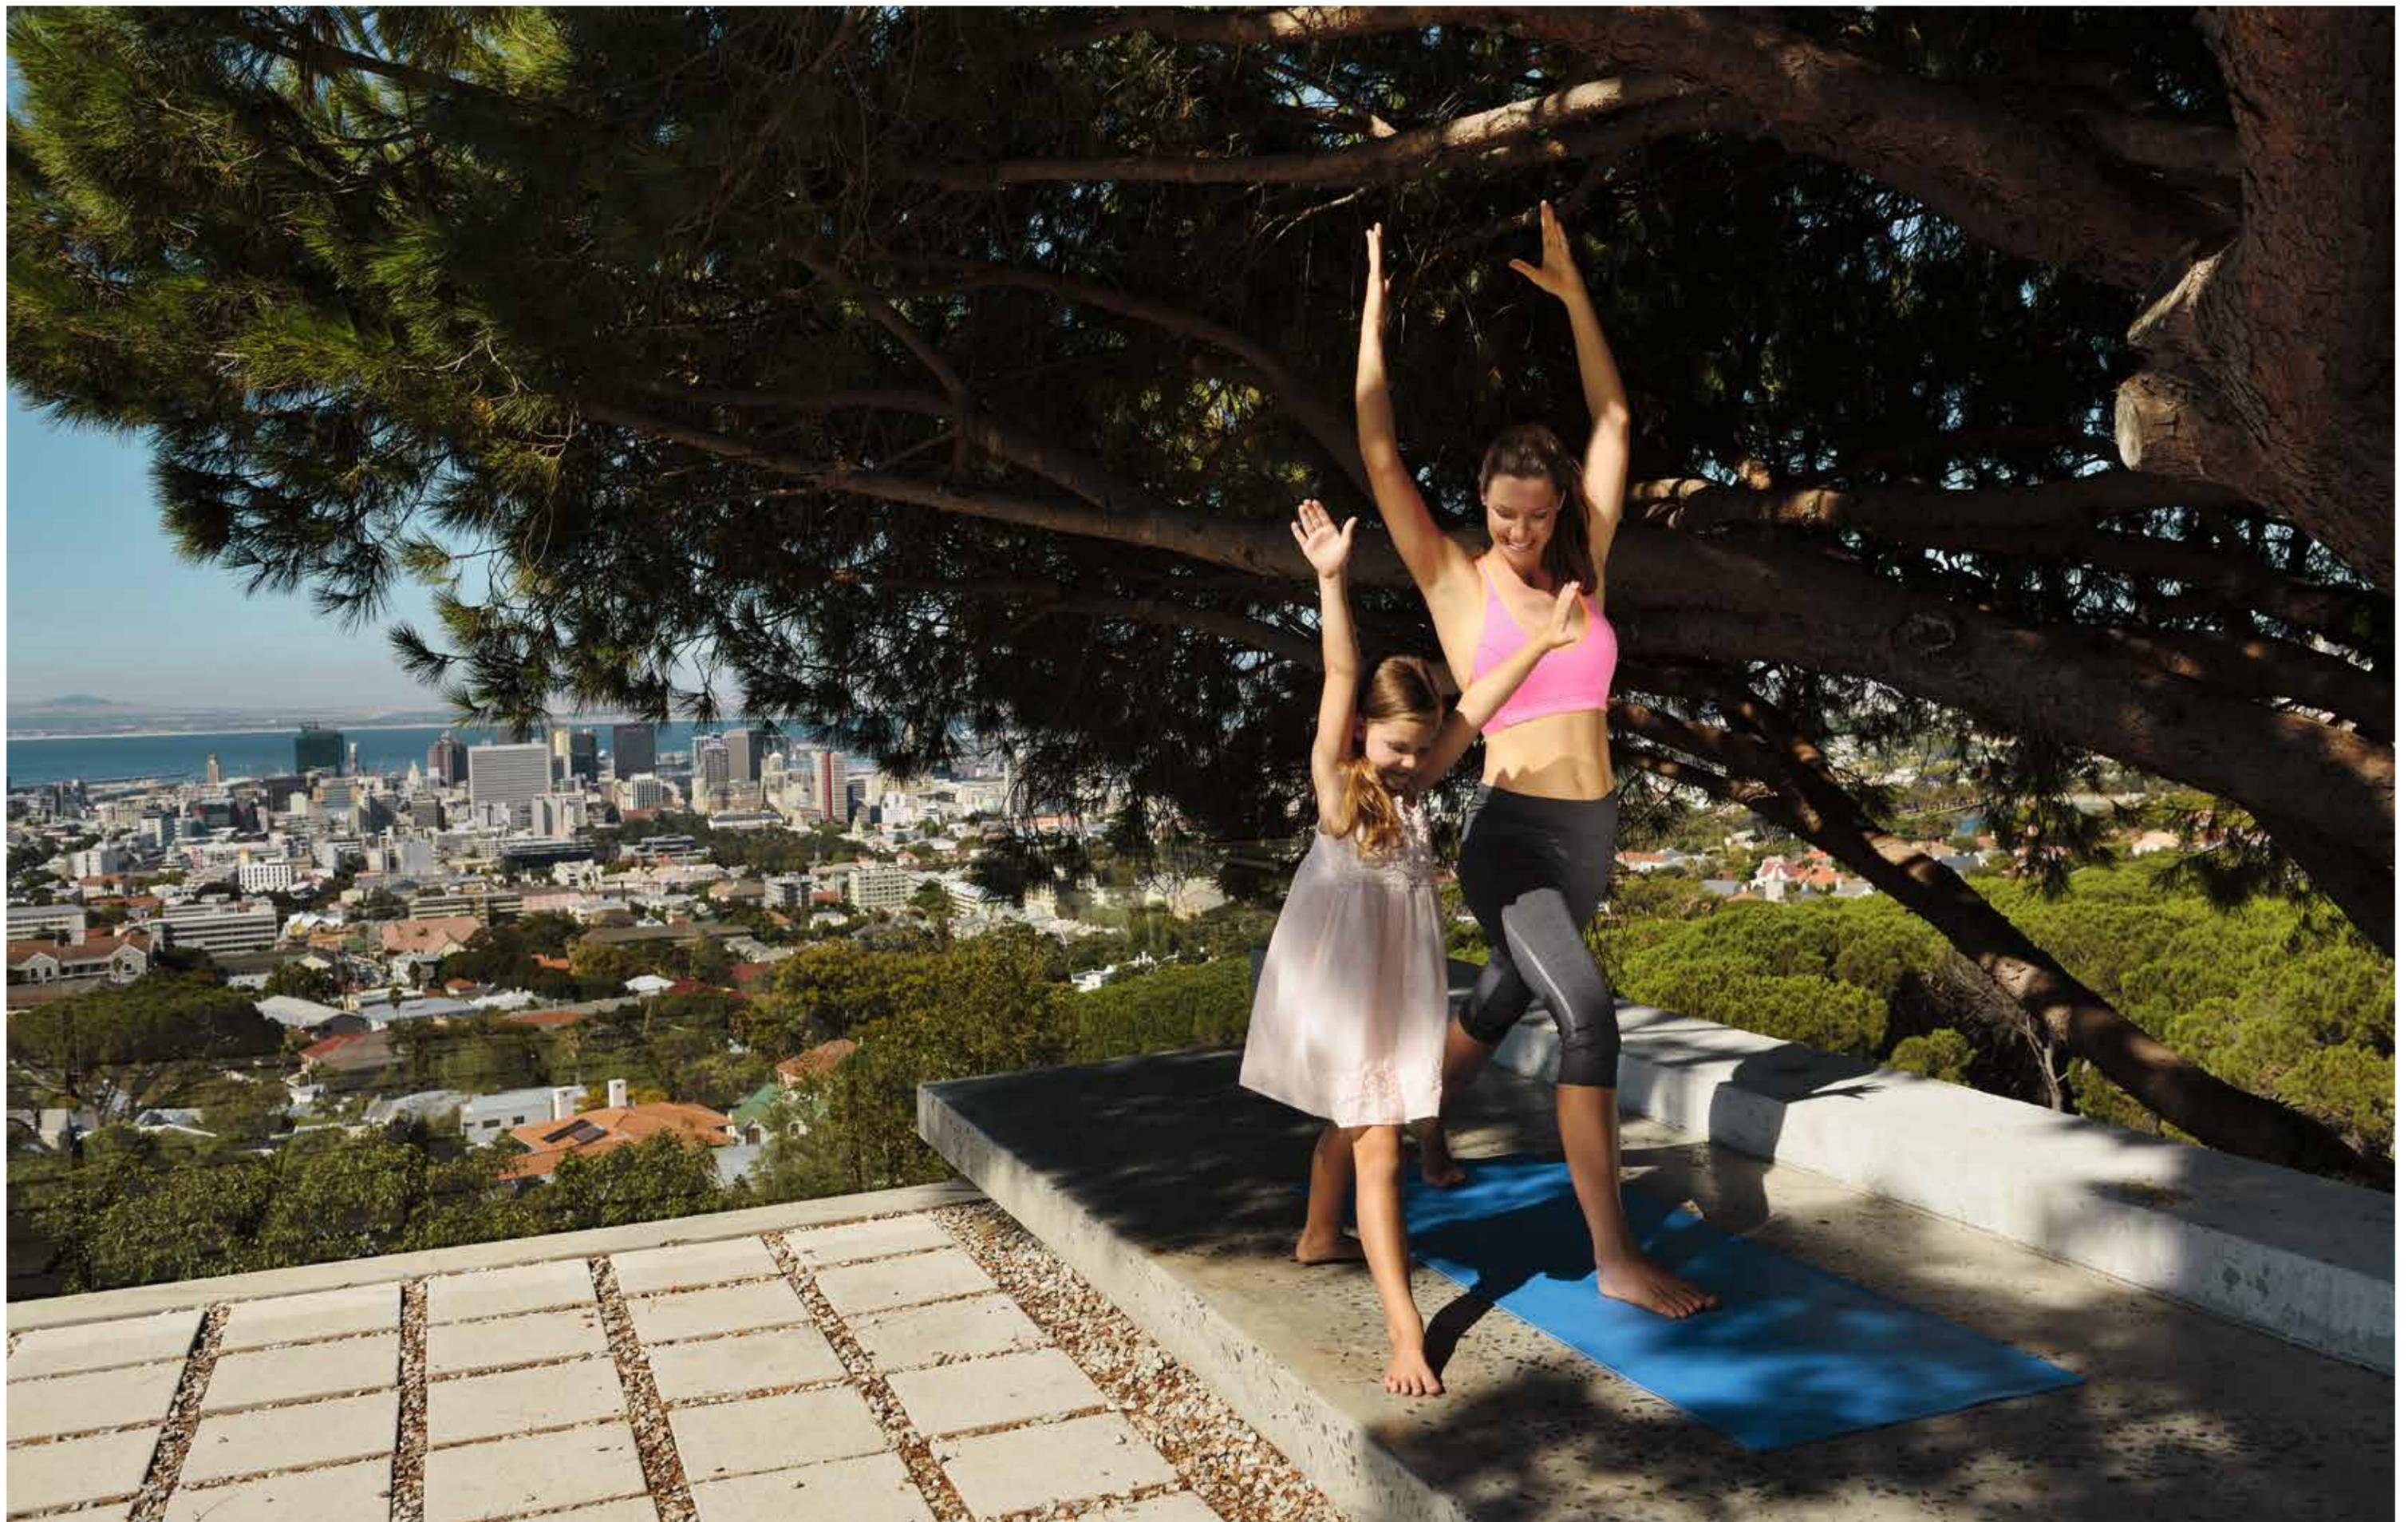

UNLIMITED HOSPITALITY

Even though EDITION 400 is at home in the discerning private bathroom, it can be found more and more in the upscale hotel branch. For both areas of use, KEUCO has designed a remarkable towel rack with integrated towel holder. The filigree elegance of the softly rounded forms and the slender rectilinear contours is underscored by a unique combination of materials comprising coloured safety glass and high quality aluminium.

Despite its extreme robustness the 600 mm wide towel rack seems to hover lightly in front of the wall, throwing fascinating shadows. The four glass colours of dark grey, white, cashmere and truffle are perfectly coordinated with the colours of many of KEUCO's furniture pieces. An eye-catcher for lovers of the unique.

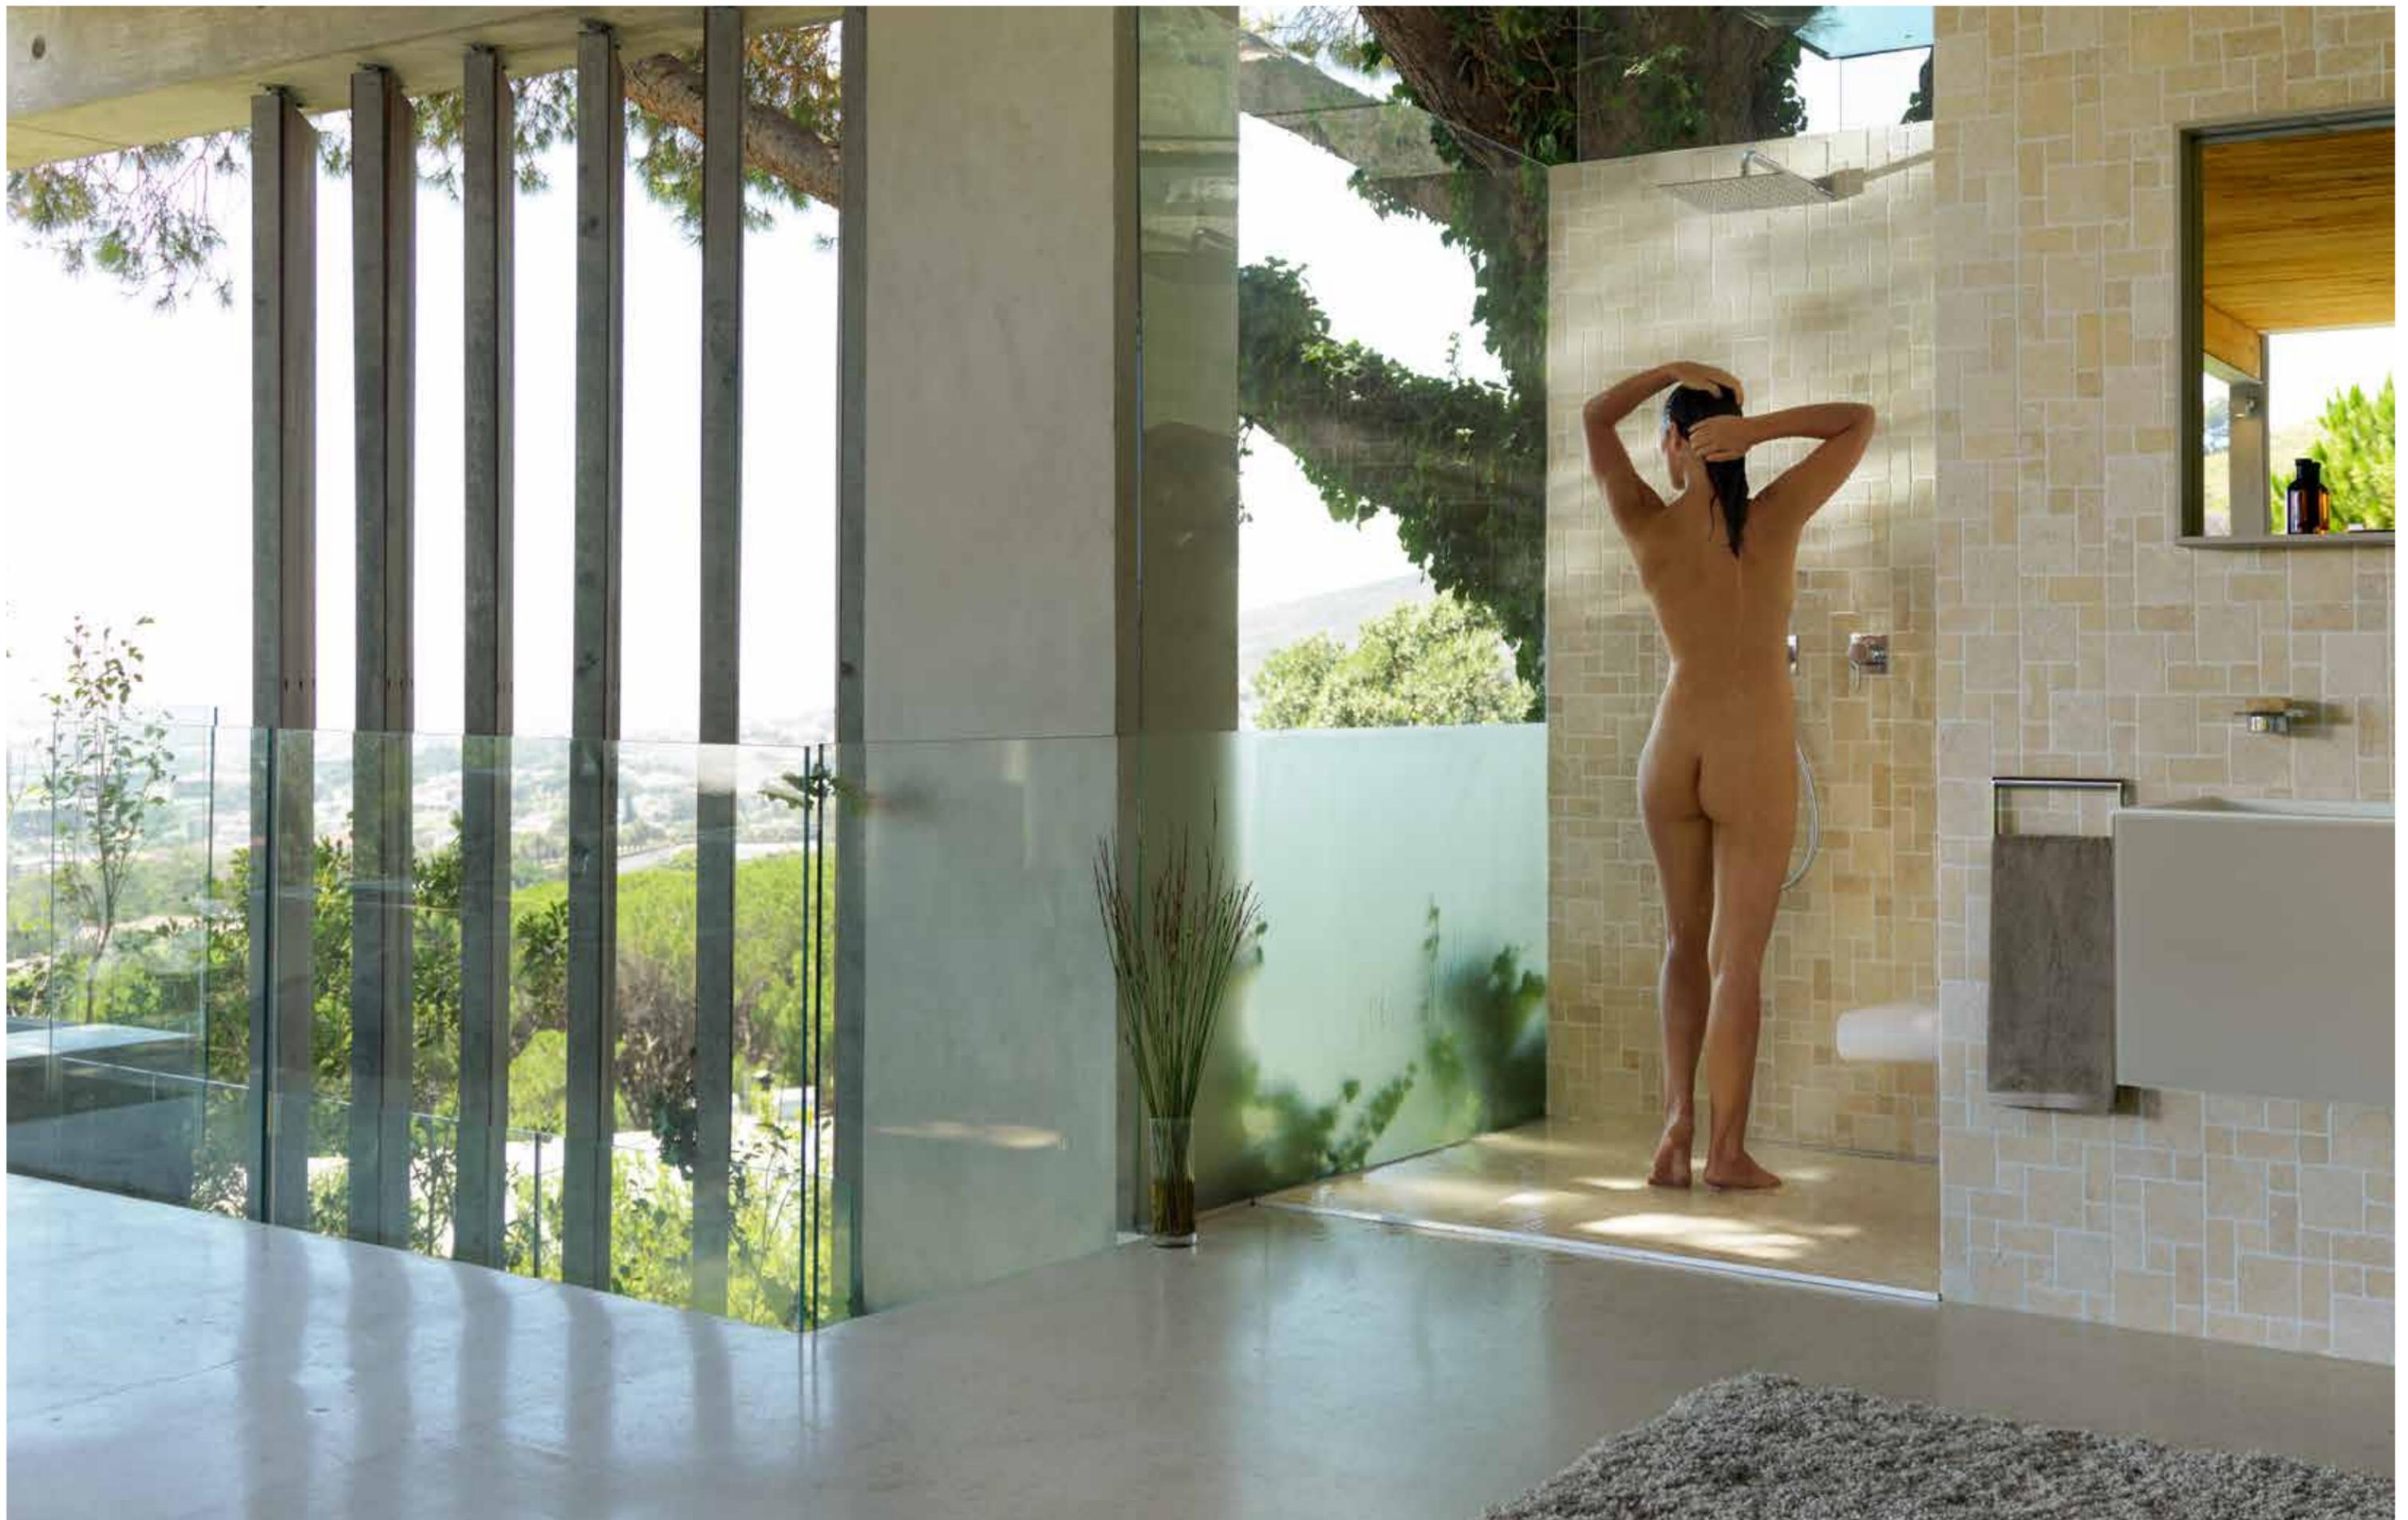

ROOM FOR COMFORT

Design and comfort are becoming increasingly important in the shower. The KEUCO shower seat offers an elegant solution for this. Made of a soft and body-friendly material, it has a pleasant and warm feel to it. The surface material ensures that one sits securely, and it is also extremely robust and easy to care for and clean. With a width of 450 mm and a depth of 330 mm, it offers ample space. The concealed, extremely robust wall mount can support up to 150 kg. Available in the colours dark grey, white, cashmere or truffle, it is a current trend-setter and is a great match for many KEUCO bathroom furnishings.

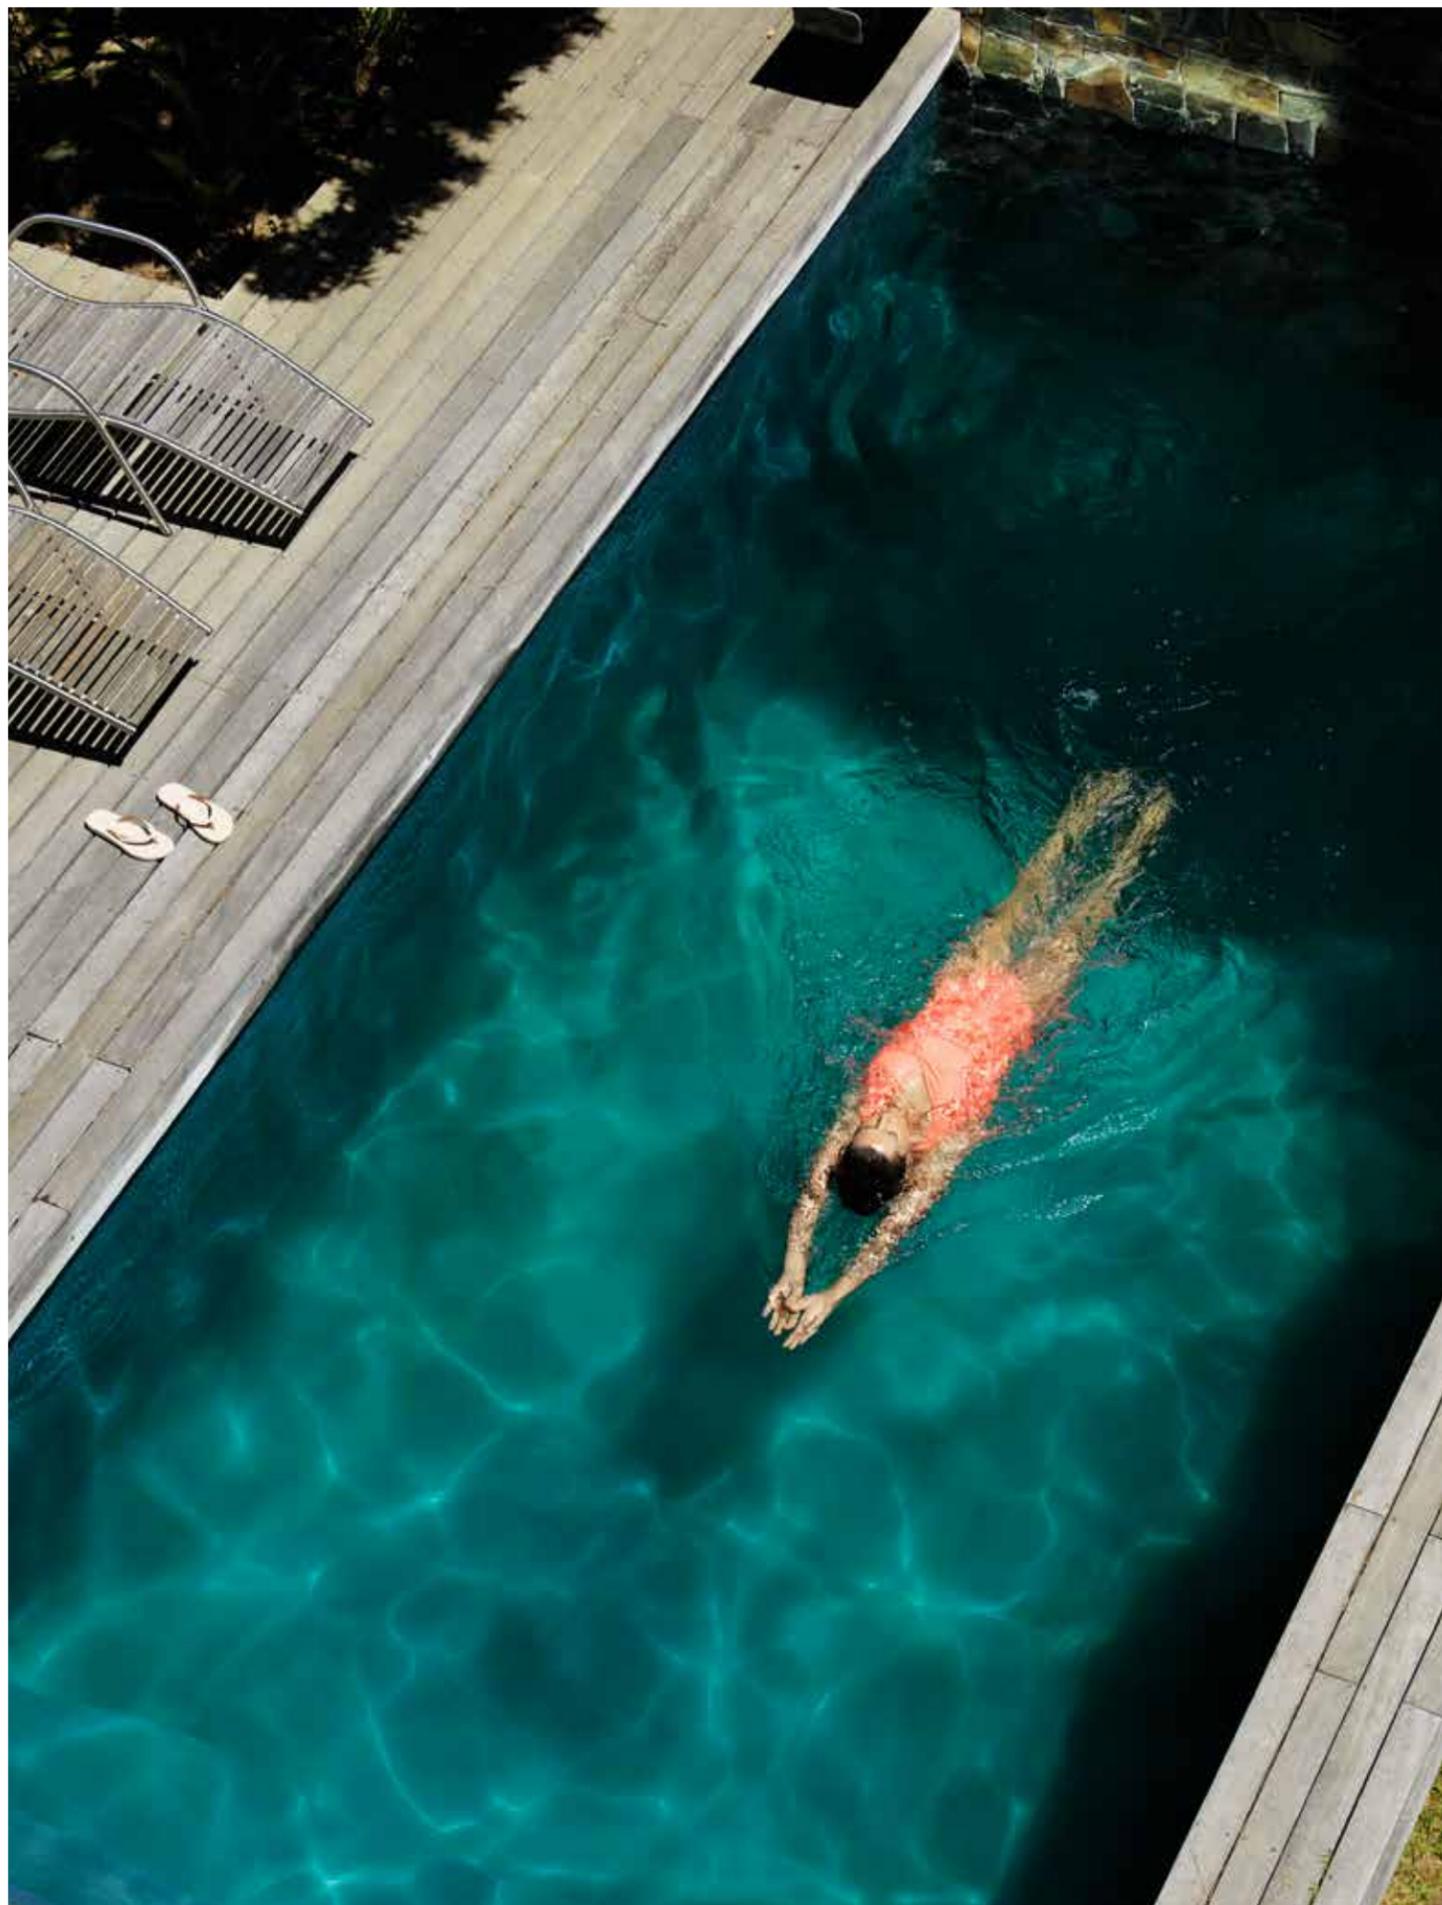

SUPERIOR SHOWERING

Once you see one of the new head showers, you'll ask yourself: How on earth did the KEUCO designers do that? After all, the head section of the shower is an unbelievable 6.5 mm thick. You'll be amazed while showering, too. The flat shower head produces a magically uniform rain pattern. And with its round or square form in various sizes it will be perfect for your individual shower plans.

Vanity unit
compatible with ceramic washbasin article no. 32940, front pull-out and internal drawer with soft closing, combinable with matching base support article no. 32998 (to be ordered separately)
Interior fittings:
– 2 inserting mats
Dimensions (w x h x d): 500 x 605 x 490 mm

32951
Vanity unit
compatible with ceramic washbasin article no. 32950, front pull-out with soft closing
Interior fittings:
– 1 inserting mat
Dimensions (w x h x d): 650 x 400 x 490 mm

32952
Vanity unit
compatible with ceramic washbasin article no. 32950, front pull-out and internal drawer with soft closing, combinable with matching base support article no. 32998 (to be ordered separately)
Interior fittings:
– 2 inserting mats
Dimensions (w x h x d): 650 x 605 x 490 mm

32961
Vanity unit
compatible with Varicor and ceramic washbasin article no. 32960, front pull-out with soft closing
Interior fittings:
– 1 inserting mat
Dimensions (w x h x d): 800 x 400 x 490 mm

32962
Vanity unit
compatible with Varicor and ceramic washbasin article no. 32960, front pull-out and internal drawer with soft closing, combinable with matching base support article no. 32998 (to be ordered separately)
Interior fittings:
– 2 inserting mats
– internal drawer with divider
Dimensions (w x h x d): 800 x 605 x 490 mm

32971
Vanity unit
compatible with ceramic washbasin article no. 32970, front pull-out with soft closing
Interior fittings:
– 1 inserting mat
Dimensions (w x h x d): 1000 x 400 x 490 mm

32972
Vanity unit
compatible with ceramic washbasin article no. 32970, front pull-out and internal drawer with soft closing, combinable with matching base support article no. 32998 (to be ordered separately)
Interior fittings:
– 2 inserting mats
– internal drawer with divider
Dimensions (w x h x d): 1000 x 605 x 490 mm

32981
Vanity unit
compatible with ceramic washbasin article no. 32980, front pull-out with soft closing
Interior fittings:
– 1 inserting mat
Dimensions (w x h x d): 1200 x 400 x 490 mm

32982
Vanity unit
compatible with ceramic washbasin article no. 32980, front pull-out and internal drawer with soft closing, combinable with matching base support article no. 32998 (to be ordered separately)
Interior fittings:
– 2 inserting mats
– internal drawer with divider
Dimensions (w x h x d): 1200 x 605 x 490 mm

32930
Tall unit
1 door with soft-closing, door hinge optionally left or right, and side shelf on the right
combinable with matching base support article no. 32998 (to be ordered separately)
Interior fittings:
– 4 glass shelves
Dimensions (w x h x d): 480 x 1750 x 300 mm

32925
Sideboard
front pull-out with soft closing, combinable with matching base support article no. 32998 (to be ordered separately)
Interior fittings:
– Glass cover plate
– 1 inserting mat
Dimensions (w x h x d): 650 x 400 x 490 mm

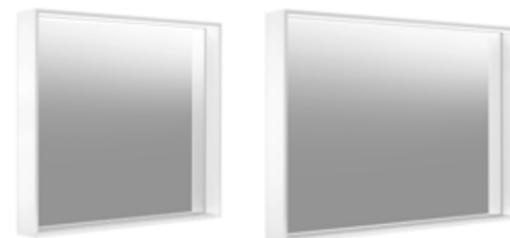

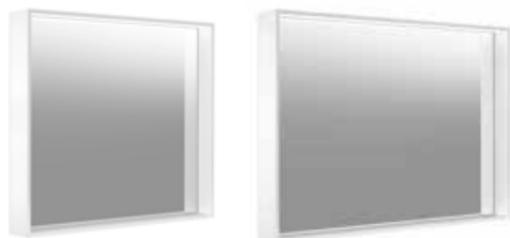

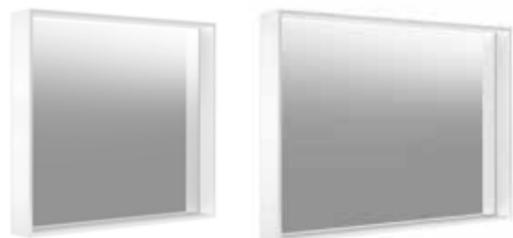

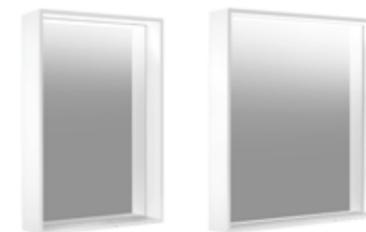

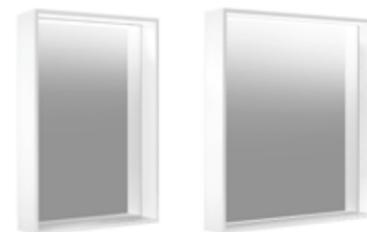

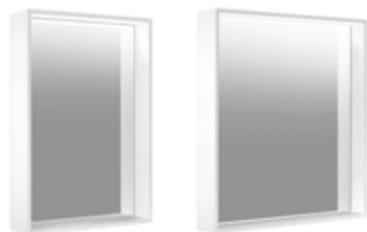

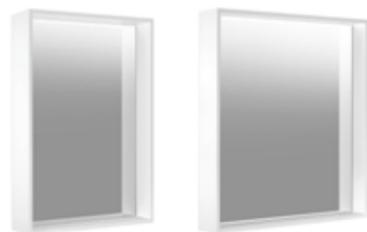

32926
Sideboard
front pull-out with soft closing, combinable with matching base support article no. 32998 (to be ordered separately)
Interior fittings:

33095

Crystal mirror
 non illuminated,
 continuous aluminium frame, lacquered
 Dimensions (w x h x d):
 500 x 700 x 105 mm
 650 x 700 x 105 mm
 800 x 700 x 105 mm
 1000 x 700 x 105 mm
 1200 x 700 x 105 mm

33096

Light mirror
 1 light colour, 3000 kelvin (daylight),
 continuous aluminium frame, lacquered
 Operation:
 – key panel with capacitive touch sensor,
 – optionally to be operated via the light switch
 Illumination:
 – LED (lifespan > 30000 hours)
 Main light (top light and wall light), and washbasin
 lighting separately infinitely dimmable and can be
 switched on/off,
 lamps non-exchangeable
 Dimensions (w x h x d):
 500 x 700 x 105 mm / 27 watt
 650 x 700 x 105 mm / 30 watt
 800 x 700 x 105 mm / 33 watt
 1000 x 700 x 105 mm / 42 watt
 1200 x 700 x 105 mm / 48 watt

33097

Light mirror
 adjustable light colour from 2700 kelvin (warm white)
 to 6500 kelvin (daylight),
 continuous aluminium frame, lacquered
 Operation:
 – key panel with capacitive touch sensor,
 – integrated extension function for e.g. light switch
 Illumination:
 – LED (lifespan > 30000 hours)
 Main light (top light and wall light), and washbasin
 lighting separately infinitely dimmable and can be
 switched on/off,
 lamps non-exchangeable
 Dimensions (w x h x d):
 500 x 700 x 105 mm / 27 watt
 650 x 700 x 105 mm / 30 watt
 800 x 700 x 105 mm / 33 watt
 1000 x 700 x 105 mm / 42 watt
 1200 x 700 x 105 mm / 48 watt

33098

Light mirror
 with mirror heater,
 adjustable light colour from 2700 kelvin (warm white)
 to 6500 kelvin (daylight),
 continuous aluminium frame, lacquered
 Operation:
 – key panel with capacitive touch sensor,
 – integrated extension function for e.g. light switch
 Illumination:
 – LED (lifespan > 30000 hours)
 Main light (top light and wall light), and washbasin
 lighting separately infinitely dimmable and can be
 switched on/off
 lamps non-exchangeable
 Dimensions (w x h x d):
 500 x 700 x 105 mm / 27 watt + 26 watt
 650 x 700 x 105 mm / 30 watt + 41 watt
 800 x 700 x 105 mm / 33 watt + 52 watt
 1000 x 700 x 105 mm / 42 watt + 65 watt
 1200 x 700 x 105 mm / 48 watt + 82 watt
