

RUBINETA

NEWS

RUBINETA is a European developer and manufacturer of faucets, shower systems, bathtubs, shower enclosures, bathroom accessories, high pressure hoses and spare parts, which always focuses on impeccable products' quality, modern design and technological innovations.

Continuing the tradition of successful cooperation with existing partners, RUBINETA strengthens its position in the markets it already works, continuously improves customer service and creates prospects for stable mutual growth.

Did you know that only 3 % of all water is fresh water and that only 1 % is available for drinking? The extreme effects of climate change will have more negative impact on our planet, like severe floods or prolonged droughts. These events not only can damage water infrastructure, but also affect availability of water. Planet and water saving is extremely important - let's take together important steps to save that 1 % of pure water.

RUBINETA TAKES IMPORTANT ACTIONS TO WATER SUSTAINABILITY

While washing hands, running a bath or using a shower, water often runs longer than it needs to. Yet water is one of the most valuable resources we have. RUBINETA products are designed to function in an environmentally friendly manner for the entire product life cycle. Touchless faucets, water saving aerators in every our faucet and water saving handshowers - these and our other products create a better tomorrow for our Planet's water resources.

RUBINETA's main goal is to develop products which meet different needs of our customers. People are looking for innovative, fashionable, functional products with high quality standards. Our team of professionals constantly follow consumer needs and new technology solutions, so our goal is not only to meet, but also to exceed the expectations of our customers!

Kitchen faucets with custom design and functionality are becoming increasingly popular. That's why we have developed new Ultima-50 models in all-black and a combination of black and rose gold elements. We have also expanded the Swan series with its distinctive design and original controls. These push-button activated sink faucets are now available in 3 colours: classic chrome, matt black and stainless steel. For those looking for a versatile solution, kitchen faucet with retractable spout is the perfect choice. The pull-out spout is very easy to use, fun to hold, easy and simple to wash dishes, rinse the sink and fill larger dish that don't fit in the sink.

"For more than 20 years, we have been following the ever-changing trends in faucets and shower products. The main task of the purchasing department is to incorporate the latest tendencies into our products in a way that is most beneficial to the consumer", – says head of the purchase department **Laima Kundrotienė**

"We pay special attention to kitchen space, so we are expanding our range with kitchen faucets with a pull-out spout. We are looking for the best solutions for the bathroom to ensure maximum ease of use and to widen creative freedom: we are expanding the range of shower systems, starting with push-button handshowers, a range of colours for bidet faucets, and introducing new click-clack waste models that work well with washbasin faucets", – **Rūta Babič**, head of Product department

"We are continuously developing technological solutions that ensure the product's long-lasting, flawless use. Unique, extremely strong and durable new polymer coating with a 5-year warranty RubiCoat-E will dispel consumer doubts about the durability and maintenance of a coloured faucet. The PVD coating used on stainless steel and rose gold ensures maximum wear resistance, low coefficient of friction, high corrosion resistance and long service life", – head of Quality control department **Lorentas Bogušis**

"Carefully designed and manufactured components and parts are an invisible but equally important part of the quality. Faucets are manufactured in accordance with EN 817 standard. The push-button operated faucets and handshowers, concealed, water-saving aerators and aerators with adjustable flow rate are the result of our approach to offer a variety of user and environment friendly solutions. All of us in the RUBINETA team closely follow consumer needs and the global trends that require sustainable use of resources, so we design with your needs in mind", – engineer **Justinas Kuncė**

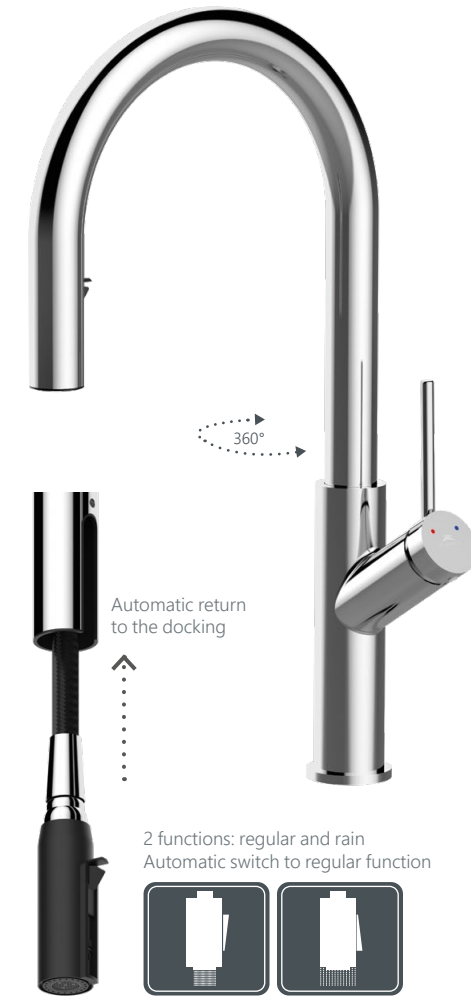

PULL OUT SPOUT KITCHEN FAUCETS

Pull out spout offers you a high level of flexibility when cleaning pans, pots and every corner of the sink. Due to the large range of movement, you can fill containers of any type and size without restriction.

710019B

Material **Brass**
Coating **RubiCoat**
Colour **Matt black**
Warranty **2 years**

HOW TO CLEAN MATT COLOURED SURFACES

- For frequent cleaning we recommend using a mild detergent. For example, vegetable oil-based soap.

- Use light and gentle cleaning forward motions from top to bottom. Please use minimum scrubbing. After cleaning, rinse the surface to remove traces of detergent.

- After use, dry the faucet, shower column or shower head with a soft microfiber cloth. It will help to keep a matt black surface free from limescale for a longer time.

- If there's still limescale on your faucet, just try to use a mild homemade detergent. For example: 9% strength vinegar diluted in equal parts with water or one teaspoon of citric acid dissolved in a glass of water.

DO NOT USE

- Don't use scourers with abrasive particles;
- Don't use any chemicals not suitable for cleaning polymer coating;
- Don't use any cleaners with unknown chemical composition;
- Don't use solvents or aggressive agents;
- Don't polish or wax;
- Don't use bleach;
- Don't use detergents that contain hydrochloric acid, acetic acid, chlorine, phosphoric acid or any other harmful, aggressive acids.
